PART 1

Welcome

This guide shows you how to use every part of the EPC AI Assistant website: what your students see, and how you run everything from the Admin console. No technical knowledge is needed. Just follow the steps.

1.1 What this website does

EPC AI Assistant is a study helper for students. A student types a question (or sends a photo of their homework) and the AI explains the answer step by step, in any subject, at any time of day.

- Students use the website at **https://pensionsync.online**.
- You and your team run everything from the **Admin console** at **https://pensionsync.online/admin/login/**.
- Each question uses a small amount of **tokens** (think of them as credit). New students get free tokens to try it. When they run out, they buy more online.
- Payments go straight to your bank account through ABA PayWay, ACLEDA Bank or Binance Pay.
- Students can also get alerts and sign-in codes on Telegram.

1.2 Words you will see

WORD	WHAT IT MEANS
Token	Credit that students spend when they ask questions. A short question uses a few hundred tokens; a long answer uses more.
Model	The AI "brain" that writes the answer, for example GPT-5 Mini or Claude 4.5. Each model has its own token balance.
Plan	A token package a student buys, for example "100K tokens for $2.49".
Free trial	Free tokens a new student gets after confirming their e-mail. Right now: 3,000 GPT-5 Mini tokens.
Admin console	The private control room for you and your staff.
Student	Anyone who uses the website to study.

WORD	WHAT IT MEANS
Staff / Role	People on your team. Each has a role (Owner, Support, Finance, Content, Operations) that decides what they can open.
Code (OTP)	A 6-digit number sent by e-mail or Telegram to prove it's really the person signing in.
Telegram bot	An automatic Telegram account (@EPCAIAssistantBot) that sends students their alerts and codes.
Channel / Group	Your Telegram channel (announcements to everyone) and your Telegram group (where students chat).
Promo code	A discount code students type when buying tokens.
Referral	When a student invites a friend with their personal link, both get bonus tokens.

1.3 The two doors into the website

	STUDENT WEBSITE	ADMIN CONSOLE
Address	https://pensionsync.online	https://pensionsync.online/admin/login/
Who uses it	Students	You and your staff only
Sign in with	The student's username or e-mail + password	Your administrator username + password
What it is for	Asking questions, buying tokens, settings	Managing students, tokens, payments, messages and settings

> **Tip:** Bookmark both addresses in your browser so you can open them with one click.

1.4 Your first 10 minutes (as the owner)

1. Open **https://pensionsync.online/admin/login/** and sign in with your owner username and password.
2. Go to **Settings** and check **Support e-mail**, **Support Telegram** and **WhatsApp number** under **Support & contact**. Students see these on the Help page. Press `Save settings`.
3. Go to **Plans** and check the prices of the plans students can buy.
4. Go to **Payment gateways** and check ABA PayWay, ACLEDA and Binance show as ready.

5. Go to **Telegram** and check the bot says **Online**.
6. Open **https://pensionsync.online** in another window (or on your phone) and create a test student account (see section 2.1). This is how you see exactly what students see.

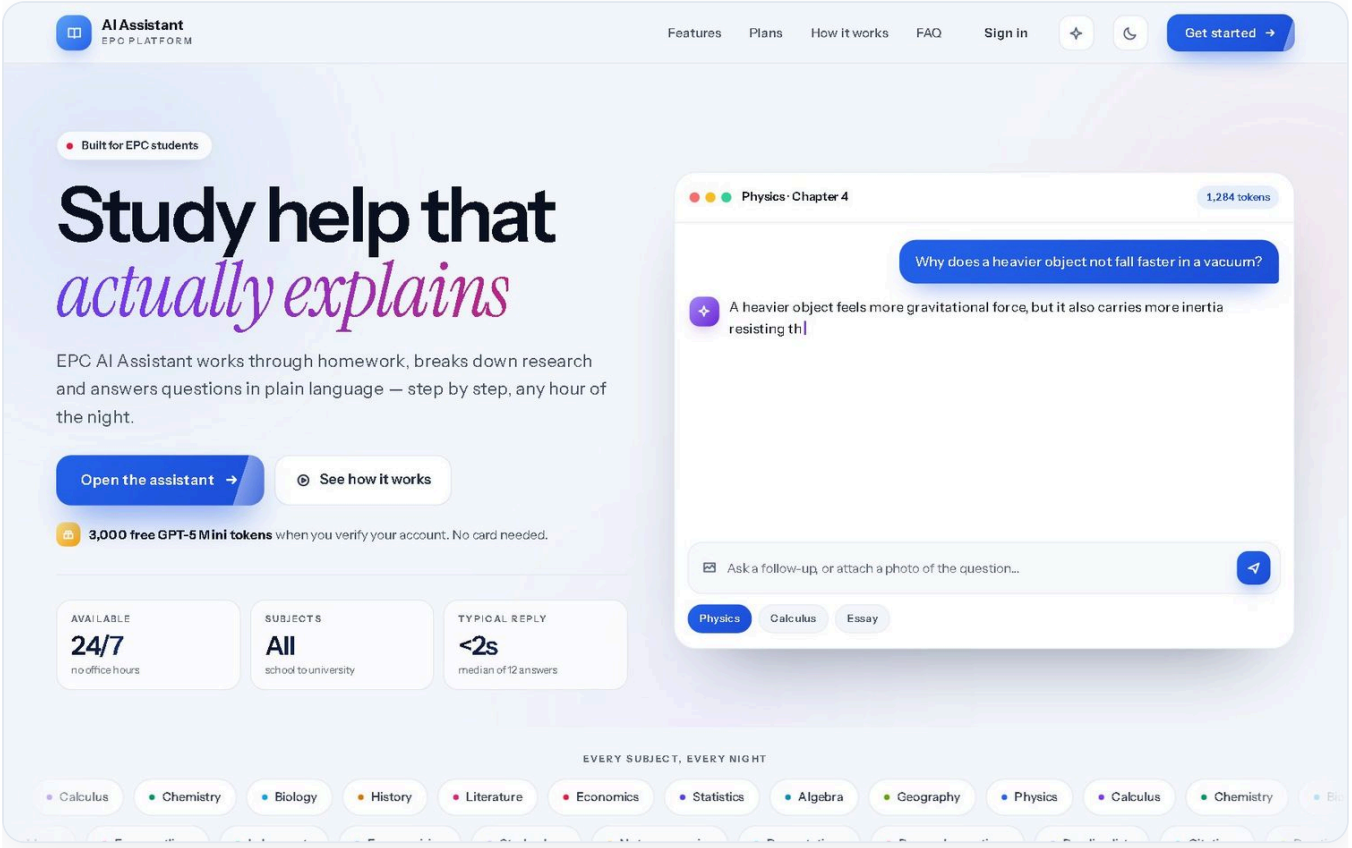

PART 2

The student side

Everything a student can do, in the order they usually do it. Use a test student account to try each step yourself.

2.1 Create a student account

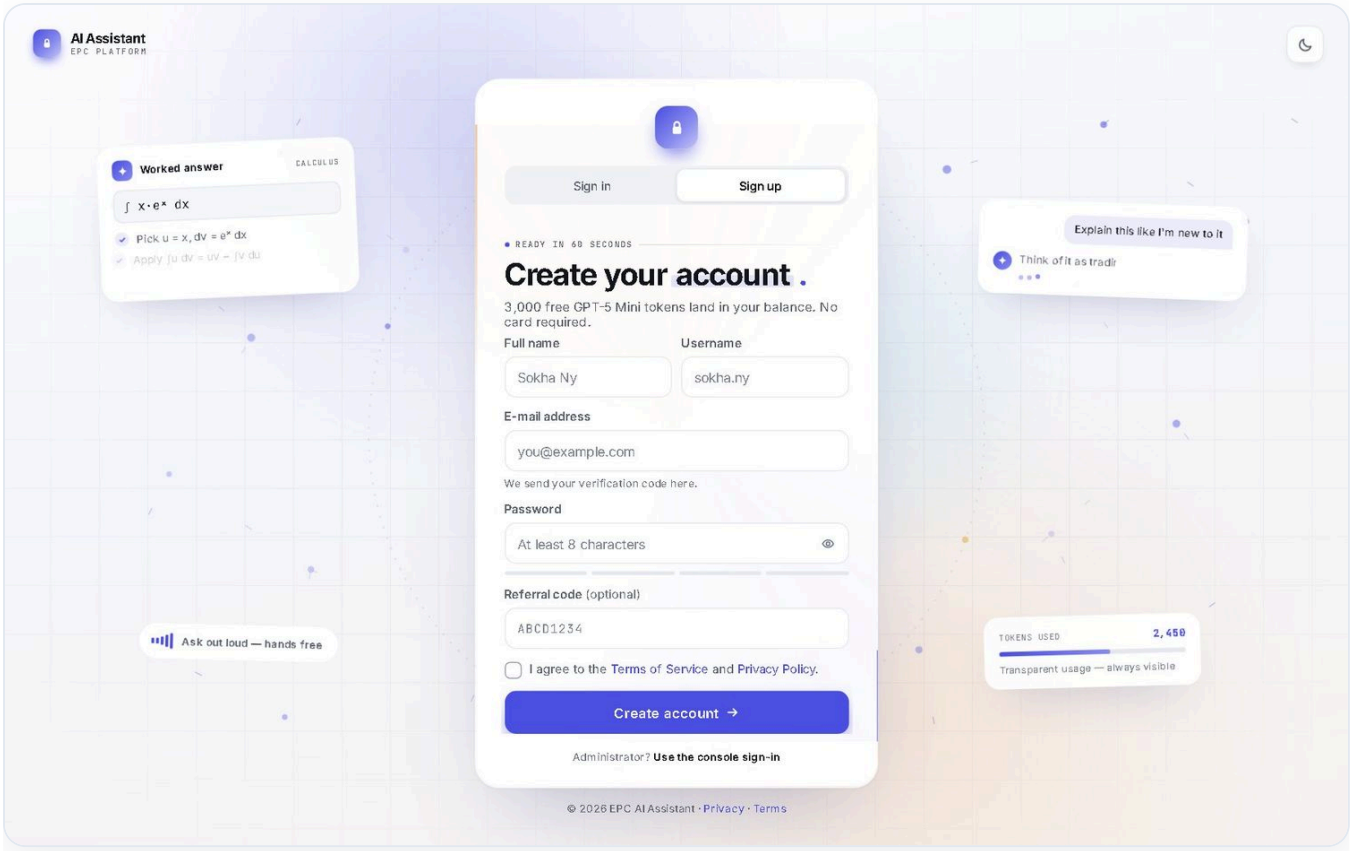

WHERE TO GO https://pensionsync.online → Get started

The home page. Students press **Get started** or **Open the assistant**.

1. Open **https://pensionsync.online** and press Get started.
2. On the **Sign up** tab, fill in **Full name**, **Username**, **E-mail address** and **Password**. If a friend invited them, they can type the friend's code in **Referral code (optional)**.
3. Tick **I agree to the Terms of Service and Privacy Policy**.
4. Press Create account.

5. A 6-digit code is e-mailed to the student. Type it into the boxes and press **Verify and continue**.

The sign-up form.

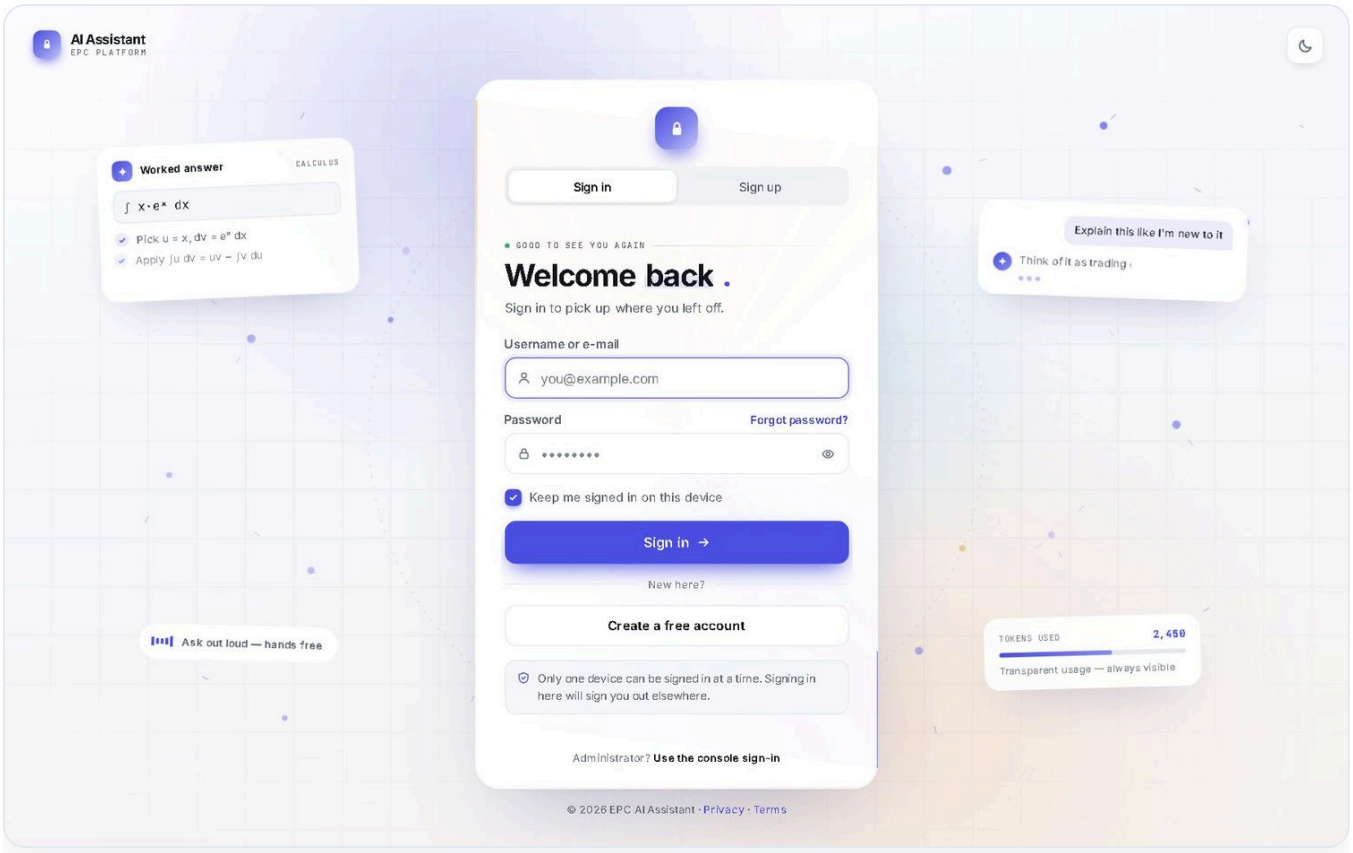

You should see: the chat page, with a welcome message saying free tokens were added (3,000 GPT-5 Mini tokens).

Tip: Prefer Telegram? On the code page, a student can press **Start our Telegram bot**, press **Start** in Telegram, come back, press **I've pressed Start**, then **Send the code to Telegram instead**. The code then arrives in Telegram.

2.2 Sign in and forgotten passwords

WHERE TO GO https://pensionsync.online/login/

1. Open **https://pensionsync.online/login/**.
2. Type the **Username or e-mail** and **Password**, then press **Sign in**.
3. If sign-in codes are switched on, a code arrives by e-mail (and Telegram, if connected). Type it and press **Verify and continue**.

The sign-in page.

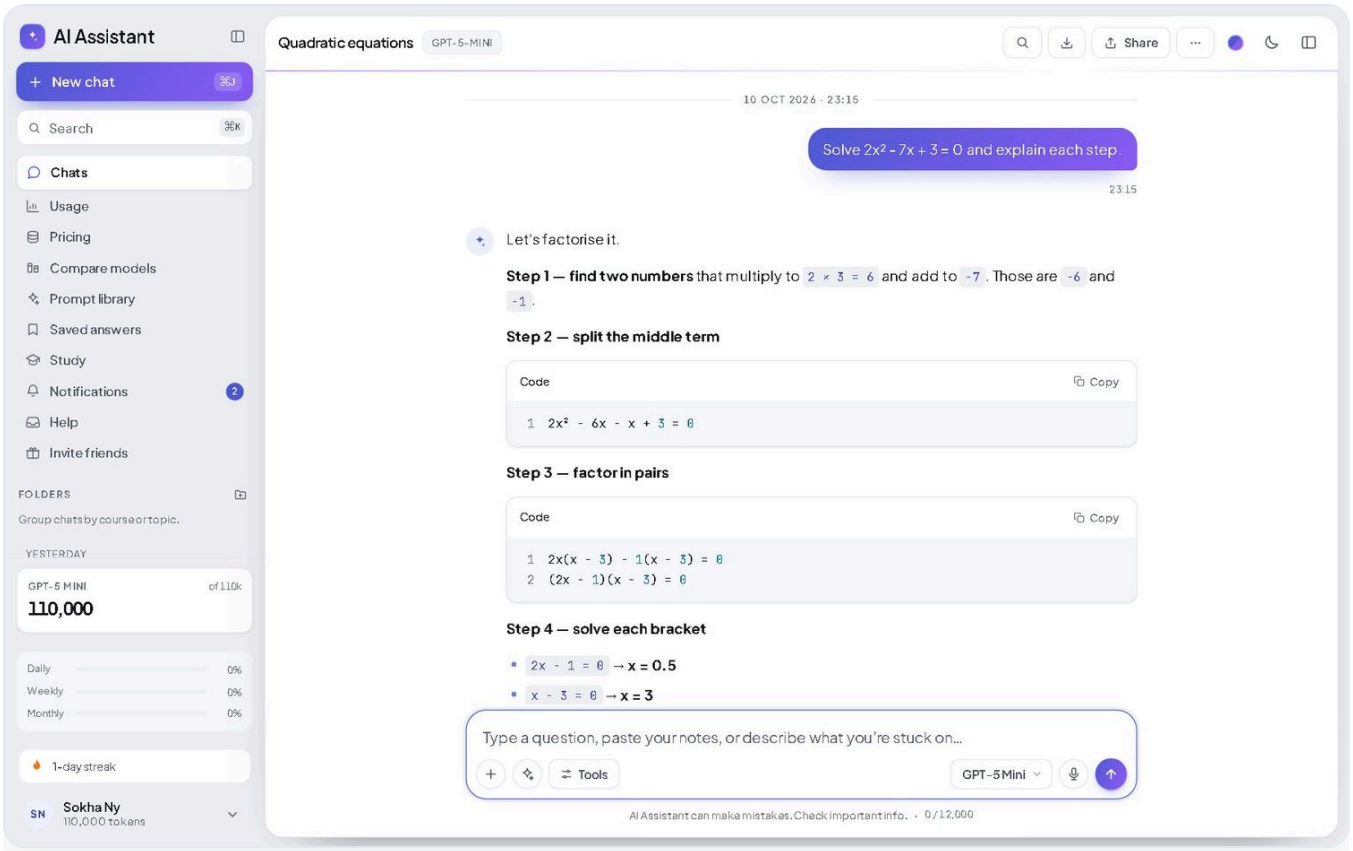

If a student forgets their password

1. On the sign-in page, press **Forgot password?**
2. Type the username or e-mail and press **Send reset code**.
3. Type the code that arrives, then choose a new password twice and press **Save new password**.

Only one device can be signed in at a time. Signing in on a phone signs the student out on their computer.

2.3 The chat page (asking questions)

WHERE TO GO https://pensionsync.online/chat/ (opens straight after signing in)

The chat page. Left: the menu and past chats. Middle: the conversation. Bottom: the box where students type.

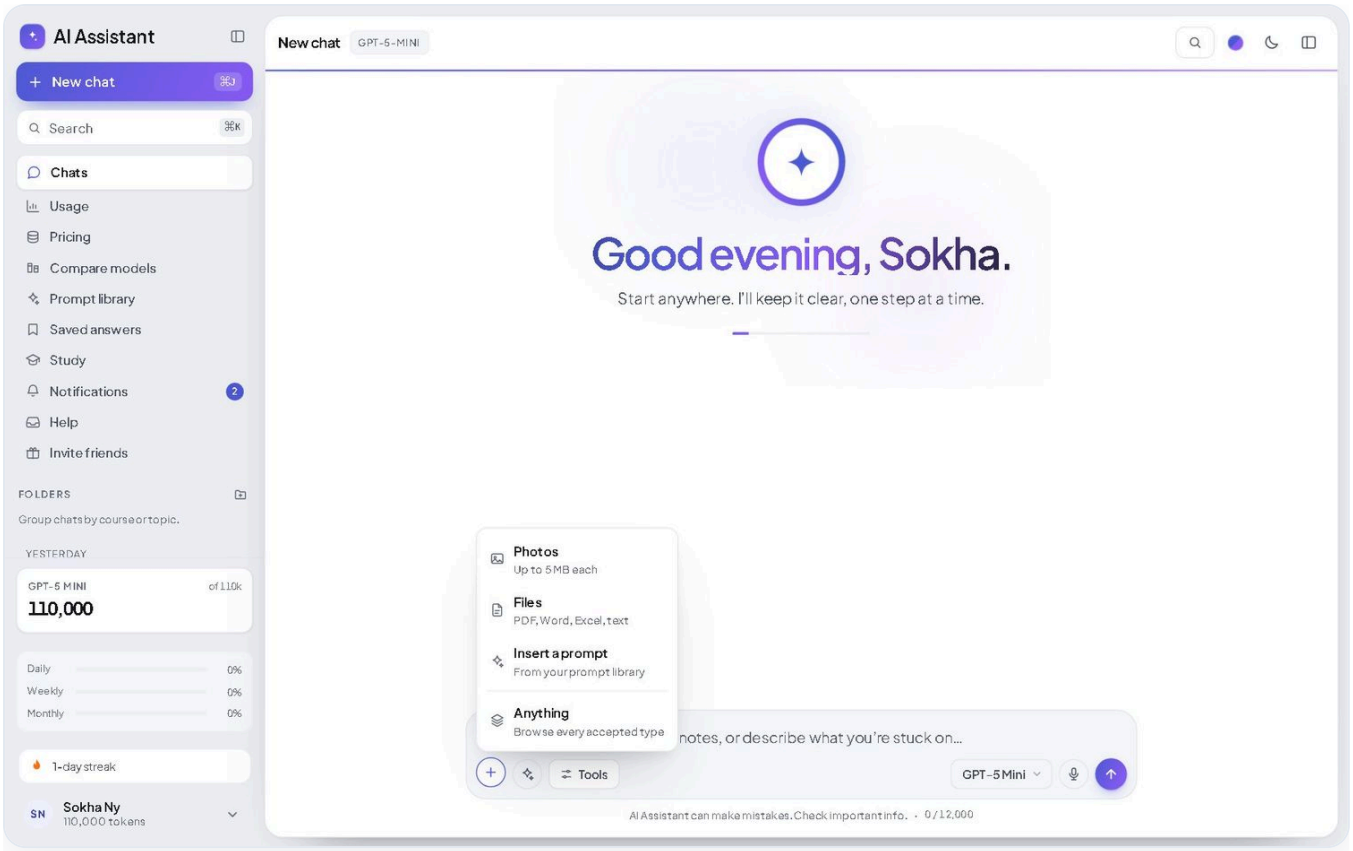

Ask a question

1. Click the big box at the bottom (it says *Type a question, paste your notes...*).
2. Type the question, for example *Explain photosynthesis in simple words*.
3. Press **Enter** on the keyboard, or the round arrow button.
4. The answer appears word by word. Press the square stop button (or Esc) to stop it early.

> **You should see:** the answer, with its token cost and time shown under it. The token box at the bottom left goes down a little.

Send a photo or a file

1. Press the + button at the bottom left of the box.
2. Choose **Photos**, **Files** (PDF, Word, Excel, text), **Camera** (on a phone) or **Anything**.
3. Pick the file. It appears as a small chip above the box.
4. Type a question about it (for example *Solve question 3*) and send.

The + menu for photos, files, the camera and saved prompts.

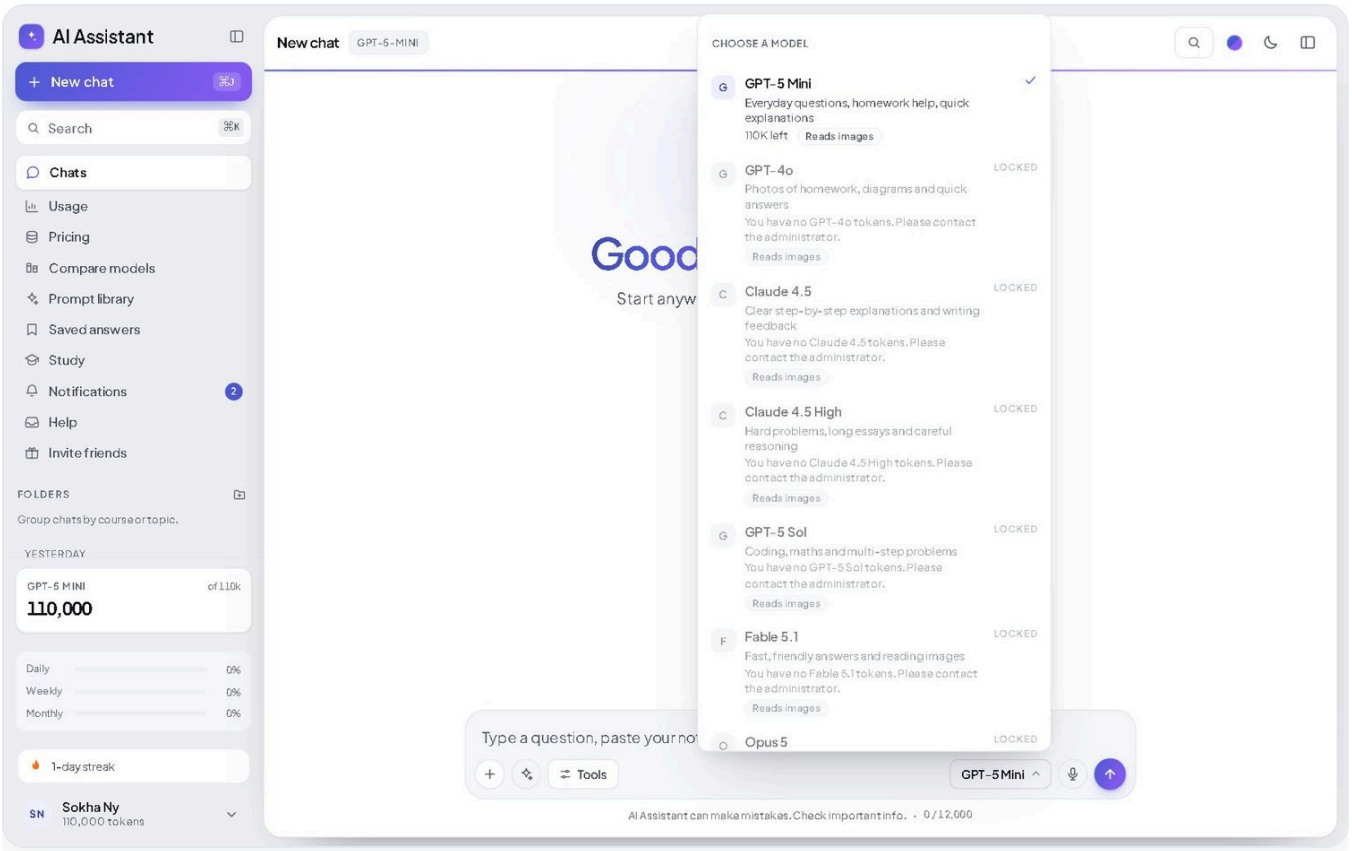

Speak instead of typing

1. Press the microphone button next to the send button.
2. Speak your question. Press ✓ to finish (or X to throw it away).
3. Check the words that appear in the box, then send.

Choose which AI model answers

Each model is good at different things, and each has its own tokens. A model the student has no tokens for shows **Locked**.

1. Press the model name at the bottom right of the box (for example **GPT-5 Mini**).
2. Pick a model from the list. Each one says what it's best at and how many tokens are left.

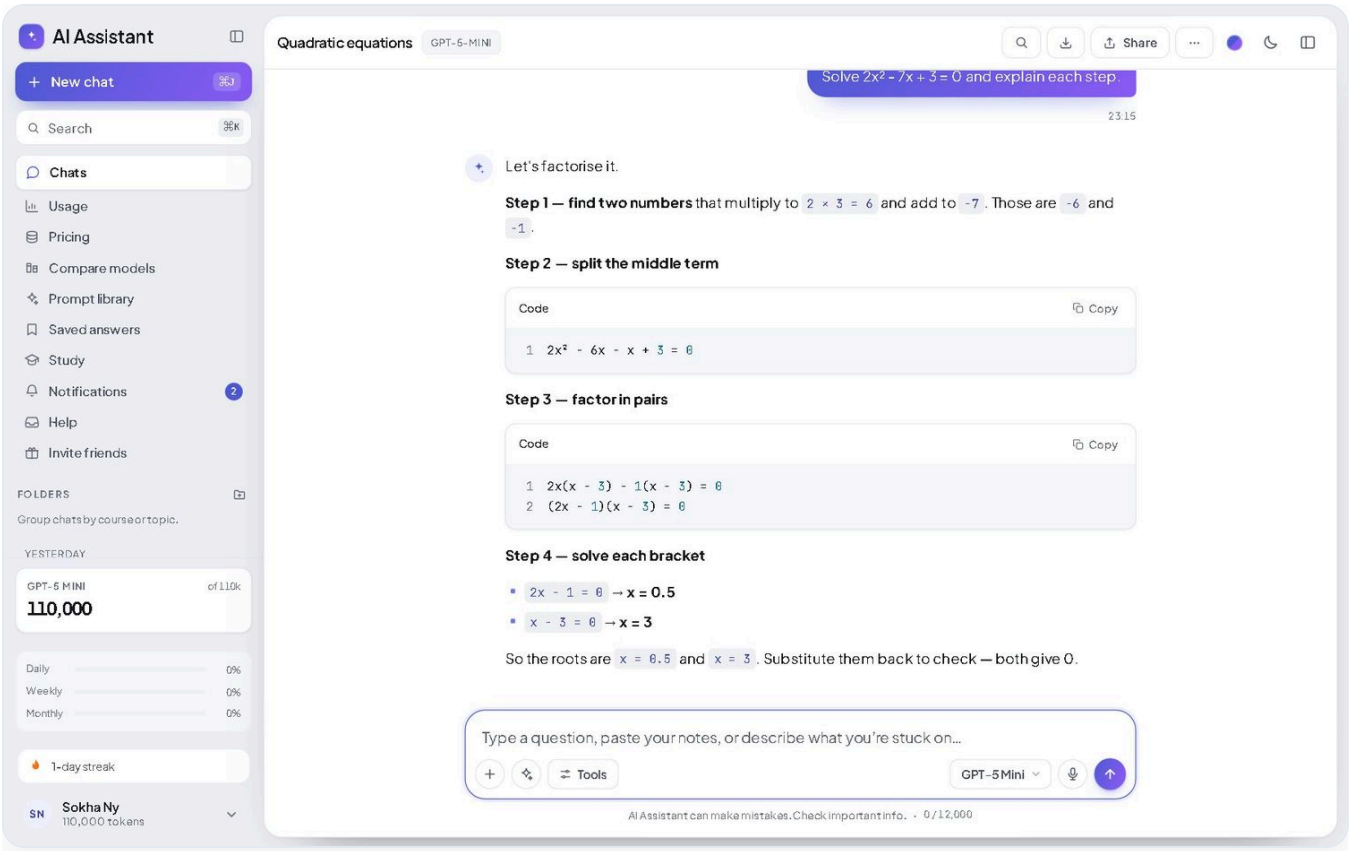

The model list. GPT-5 Mini is ready; the others are locked until the student buys tokens for them.

Things you can do with an answer

Move the mouse over an answer (or tap it on a phone) to see these buttons:

BUTTON	WHAT IT DOES
Copy	Copies the answer so it can be pasted somewhere else.
Listen	Reads the answer out loud.
Helpful / **Not helpful**	Thumbs up or down. "Not helpful" asks what went wrong, and the team sees it in Answer quality.
Save	Keeps the answer in **Saved answers** to find it later.
Branch	Starts a new chat that continues from this answer.
Regenerate	Writes the newest answer again, differently.
Rewrite	Makes the newest answer **Shorter**, **Simpler**, **More detail**, **As steps**, or **Translate...** it.
Edit (on the student's own message)	Changes the question and sends it again.

An answer with its action buttons, and suggested follow-up questions under **Ask next**.

Make a picture

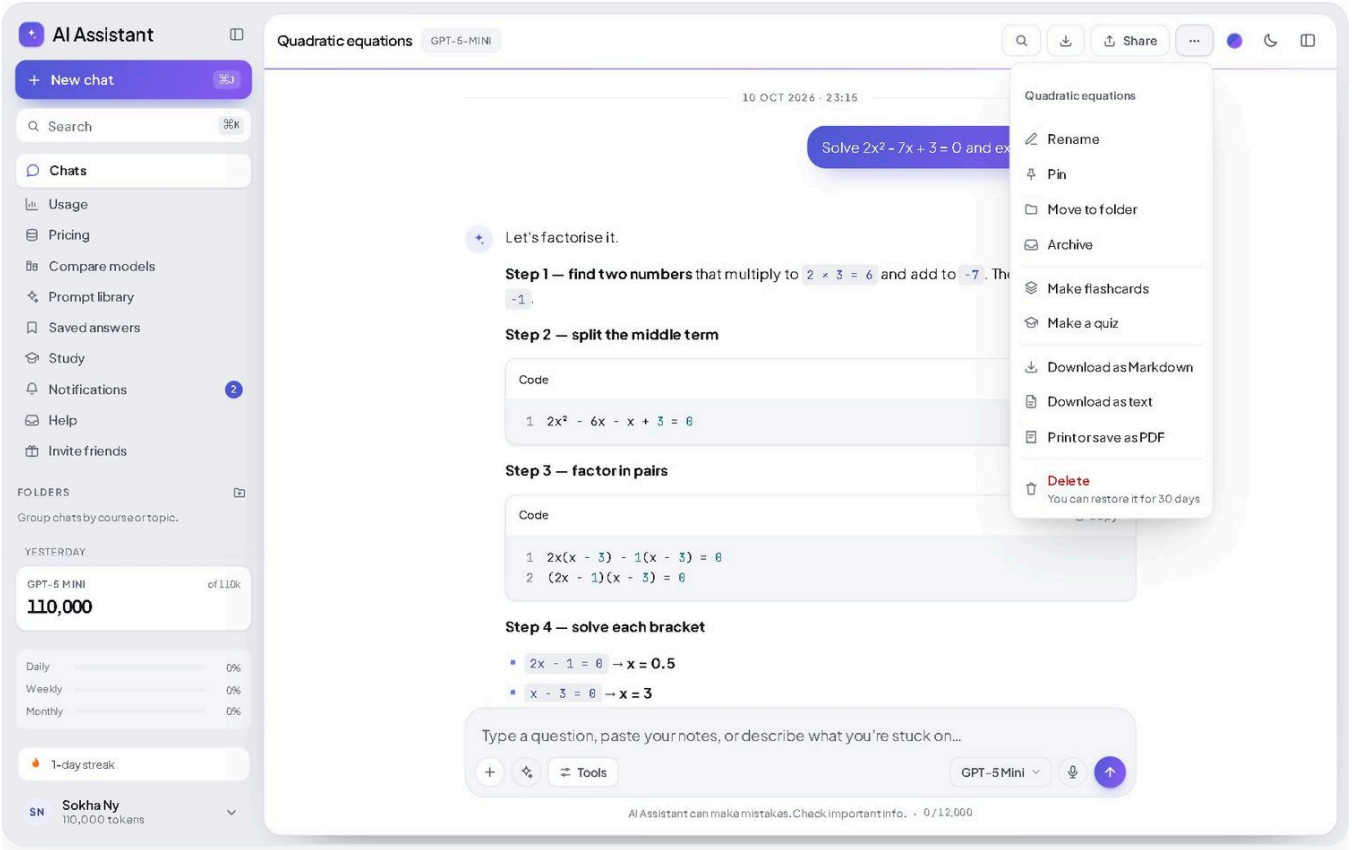

There is no special button. The student simply asks, for example *Draw a diagram of the water cycle*. The picture appears in the answer with **Download** and **Share** buttons. Click it to see it bigger.

Organise chats

Press New chat (top left) to start a fresh conversation. Past chats are listed on the left, newest first. Press the ⋯ button next to a chat (or at the top of the page) for these options:

OPTION	WHAT IT DOES
Rename	Gives the chat a clearer name.
Pin	Keeps it at the top of the list.
Move to folder	Puts it in a folder (create folders with the + next to **Folders** on the left).
Archive	Hides it from the list without deleting it (find it under **Archived chats**).
Make flashcards / **Make a quiz**	Turns the chat into study cards or a quiz (see 2.7).
Download	Saves the chat as a text file, or **Print or save as PDF**.

OPTION	WHAT IT DOES
Delete	Moves it to **Recently deleted**. It can be restored for 30 days.

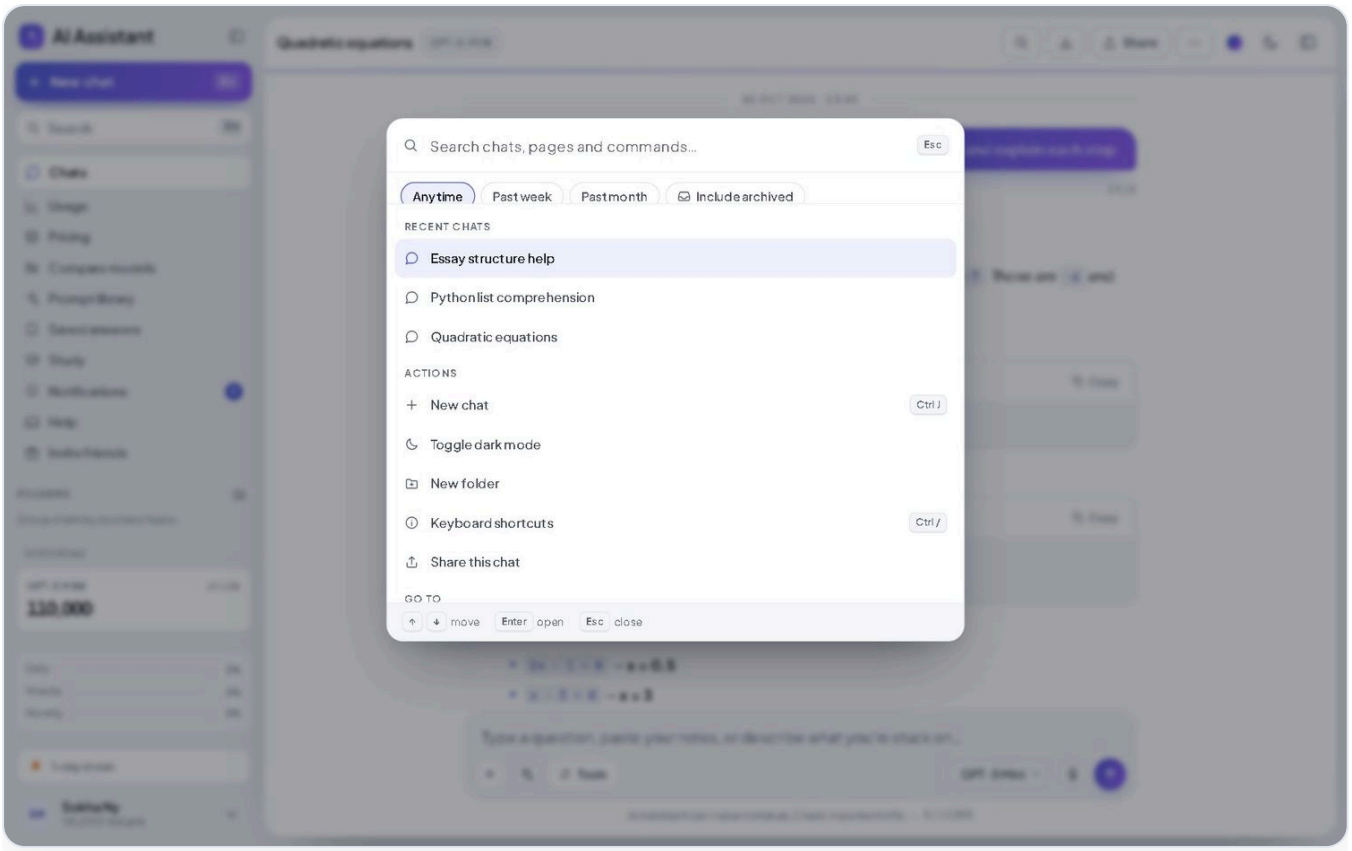

The chat options menu.

Share a chat

1. Open the chat and press **Share** at the top.
2. Press **Create link**, then **Copy**. Anyone with the link can read the chat (but not change it).
3. To stop sharing, open the same window and press **Stop sharing**.

Search and shortcuts

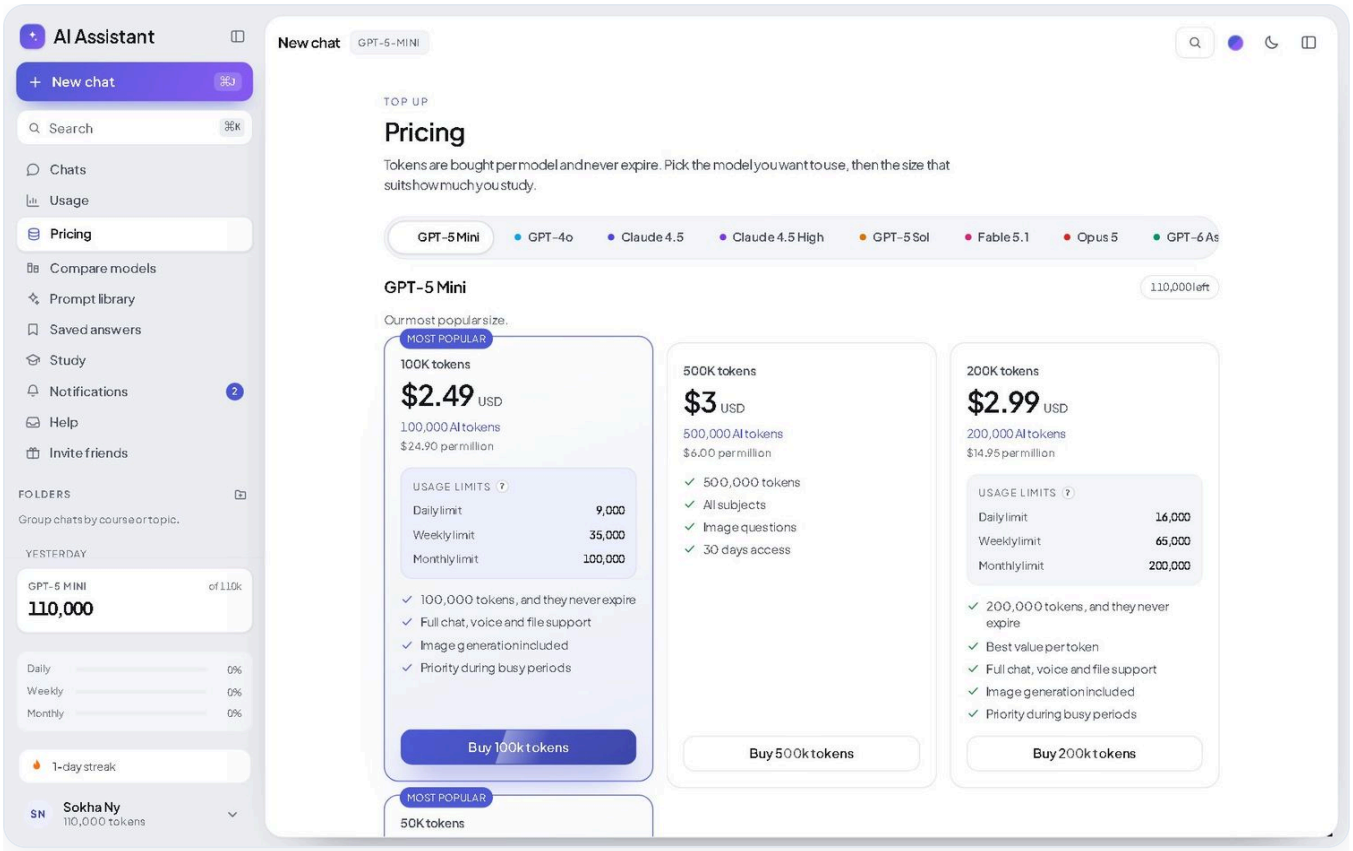

Press **Ctrl + K** (or the magnifying glass at the top) to search all chats and jump to any page. Press **Ctrl + /** to see every keyboard shortcut.

The search box. It finds chats by their words and by their meaning.

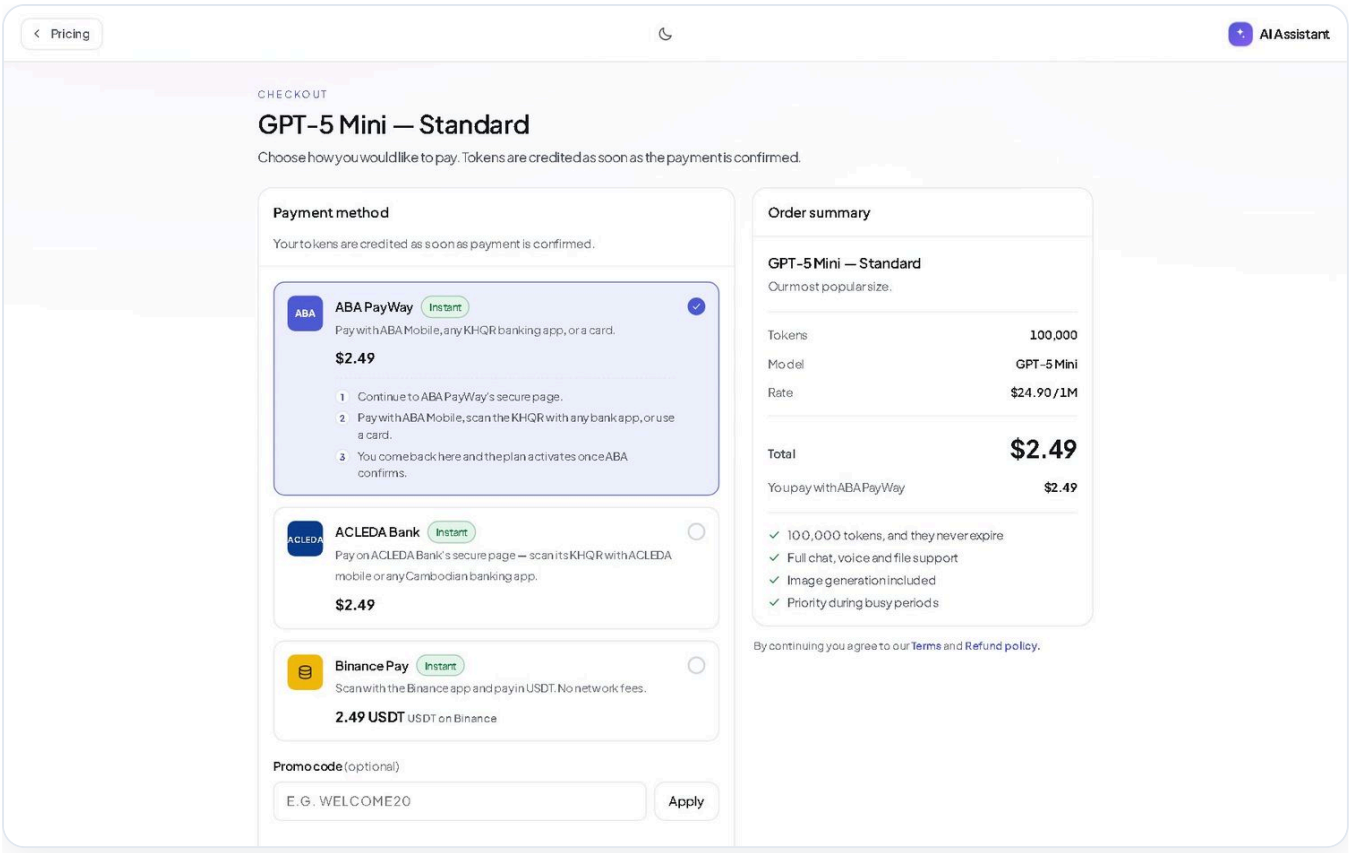

2.4 Buy tokens

WHERE TO GO Left menu → **Pricing**

The Pricing page. Tabs at the top switch between models; each card is a token package.

1. Press **Pricing** in the left menu.
2. Pick the model at the top (for example **GPT-5 Mini**).
3. Press **Buy 100k tokens** (or another package).
4. Choose how to pay: **ABA PayWay**, **ACLEDA Bank** or **Binance Pay**. Have a discount code? Type it in **Promo code** and press **Apply**.
5. Press **Continue to payment**.
6. Pay on the bank page or by scanning the QR code with the banking app.
7. Come back to the website. When the bank confirms, the tokens are added automatically and a receipt appears. If it takes a moment, press **I've paid — check now**.

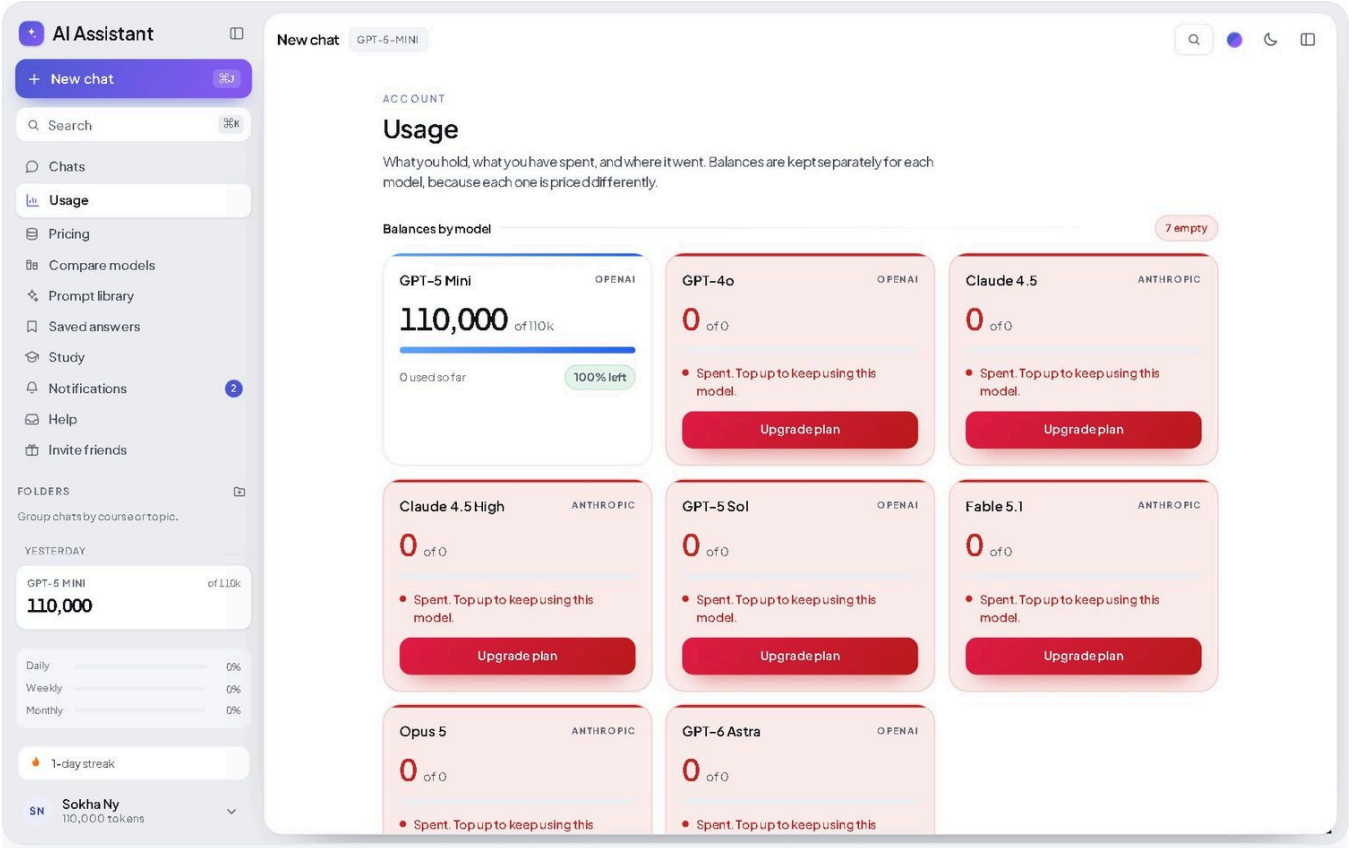

Checkout: choose the payment method on the left; the order summary is on the right.

You should see: "Payment confirmed" and a receipt. The tokens appear in the token box at the bottom left. The receipt is also under **Billing**.

Be careful: these are real payments into your bank account. To test, buy the smallest package. If a payment ever gets stuck, the admin can check and confirm it (see 3.12).

2.5 Usage, billing and comparing models

PAGE (LEFT MENU)	WHAT IT SHOWS
Usage	Tokens left for each model, daily/weekly/monthly limits, a chart of the last 7/30/90 days, and every token spent.
Billing (account menu)	Money spent, tokens bought, the current plan and every invoice with its receipt.
Compare models	Each AI model side by side: price, whether it reads images, rating, and the student's balance. Buttons **Chat with it** and **Buy tokens**.

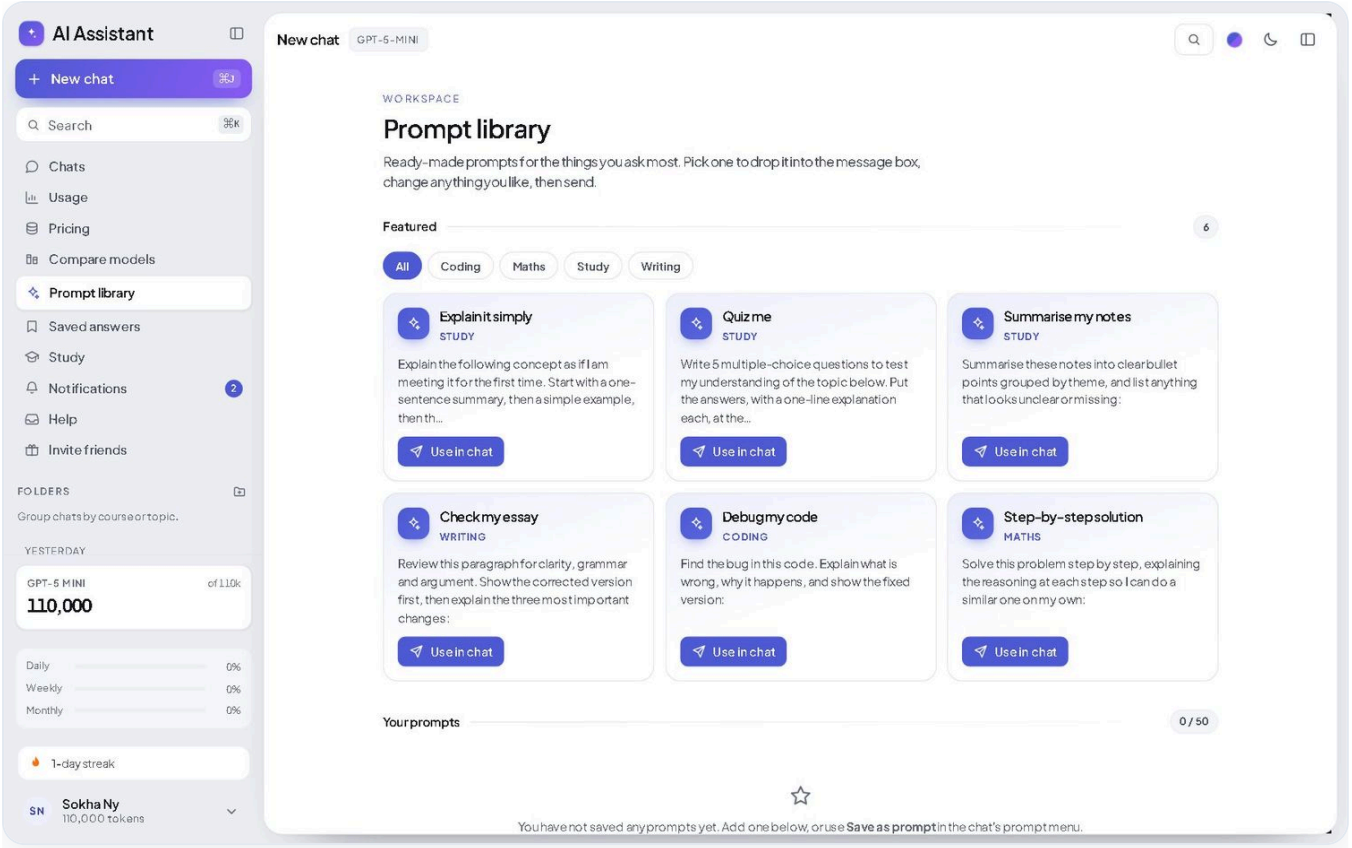

The Usage page.

2.6 Prompt library and saved answers

WHERE TO GO Left menu → **Prompt library** / **Saved answers**

- **Prompt library**: ready-made questions. Press **Use in chat** to put one in the chat box. Students can also save their own with **Save prompt**.
- **Saved answers**: every answer the student pressed **Save** on. Each can be opened in its chat, copied, or given a note.

The Prompt library.

2.7 Study: flashcards and quizzes

WHERE TO GO Left menu → **Study**

1. Open **Study**. Under **Make a new set**, choose a chat in **From this chat**.
2. Choose Flashcards or Quiz, and how many (5, 8 or 12).
3. Press **Make it**.
4. Flashcards: tap the card to turn it, then press **Got it** or **Still learning**. Quiz: pick an answer for each question, then **See my score**.

The Study page also shows the student's daily goal and streak (how many days in a row they studied).

2.8 Notifications

WHERE TO GO Left menu → **Notifications**

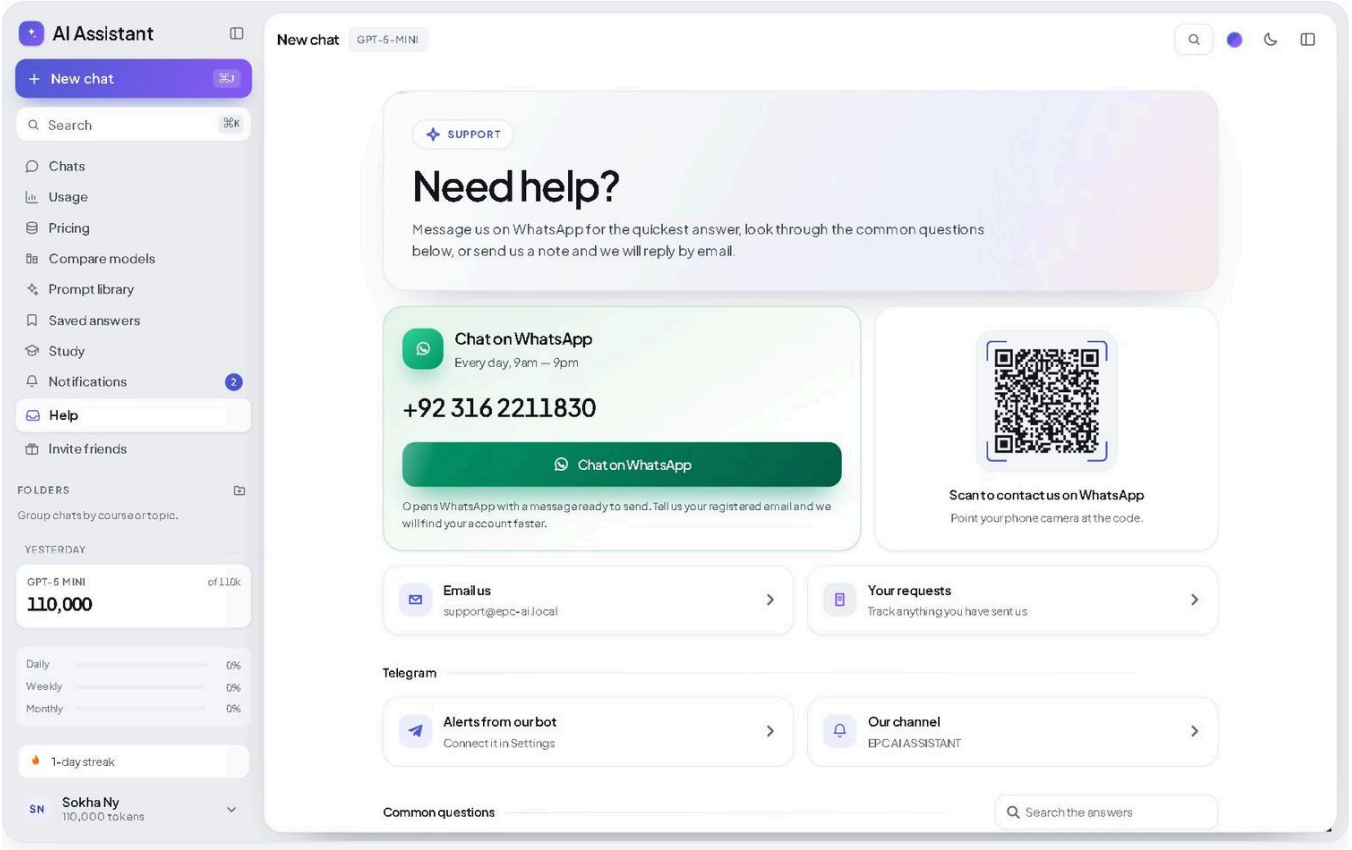

Messages from the team and automatic alerts (payment confirmed, running low on tokens, plan ending, announcements). The number next to the menu shows how many are unread. Press

Mark all as read to clear them.

2.9 Help and support requests

WHERE TO GO Left menu → **Help**

1. Open **Help**. Read **Common questions** first; the search box finds answers quickly.
2. To contact the team, scroll to **Ask us anything**, choose a topic, write a subject and the problem, add a screenshot if helpful, and press Send request.
3. Replies appear under **Your requests**. Open a request to read the reply and answer back.

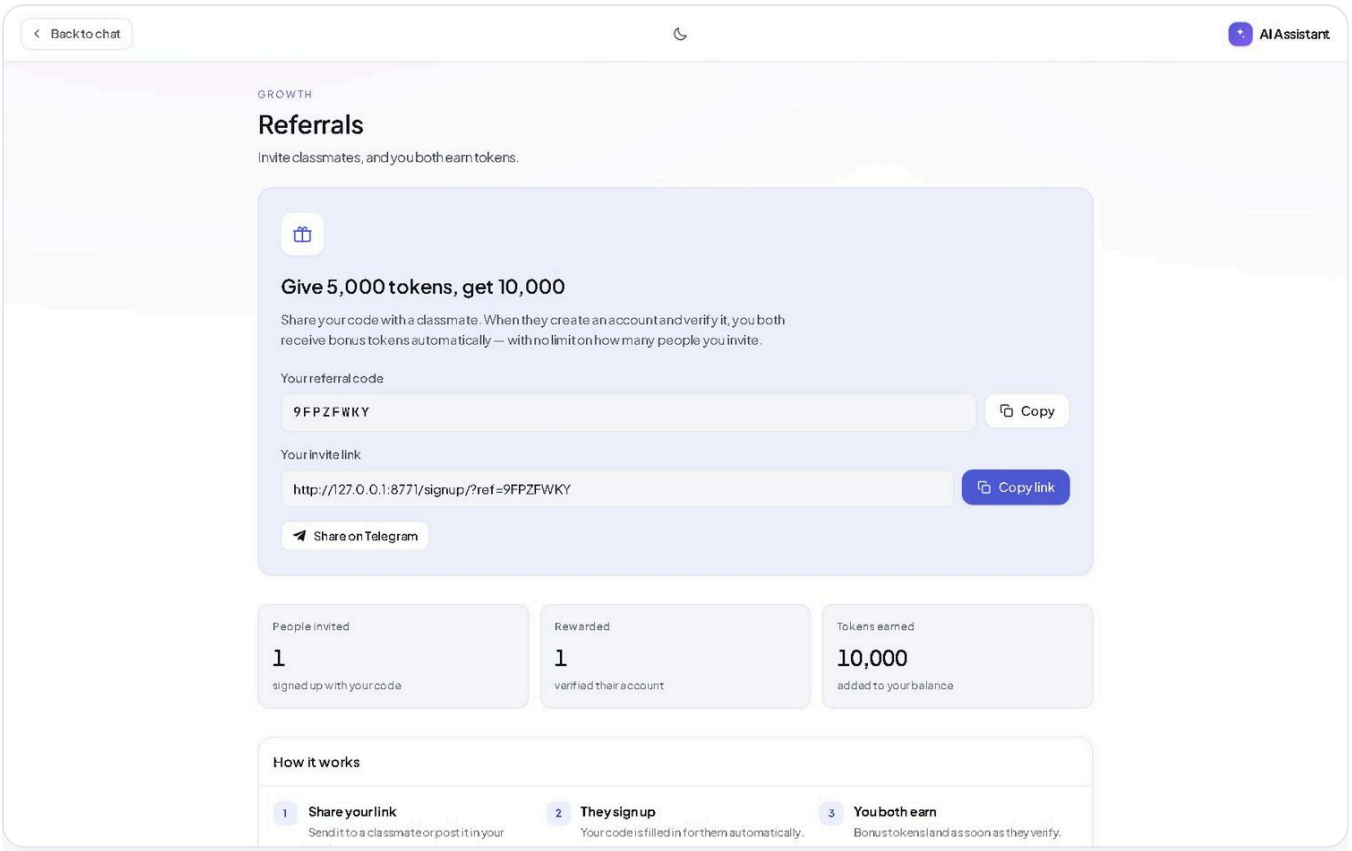

The Help page with contact options and common questions.

2.10 Invite friends

WHERE TO GO Left menu → **Invite friends**

Each student has a personal code and invite link. Press Copy link or Share on Telegram. When a friend signs up with it and verifies, both get bonus tokens. The page shows how many people they invited and the tokens earned.

The Invite friends page.

2.11 Profile and settings

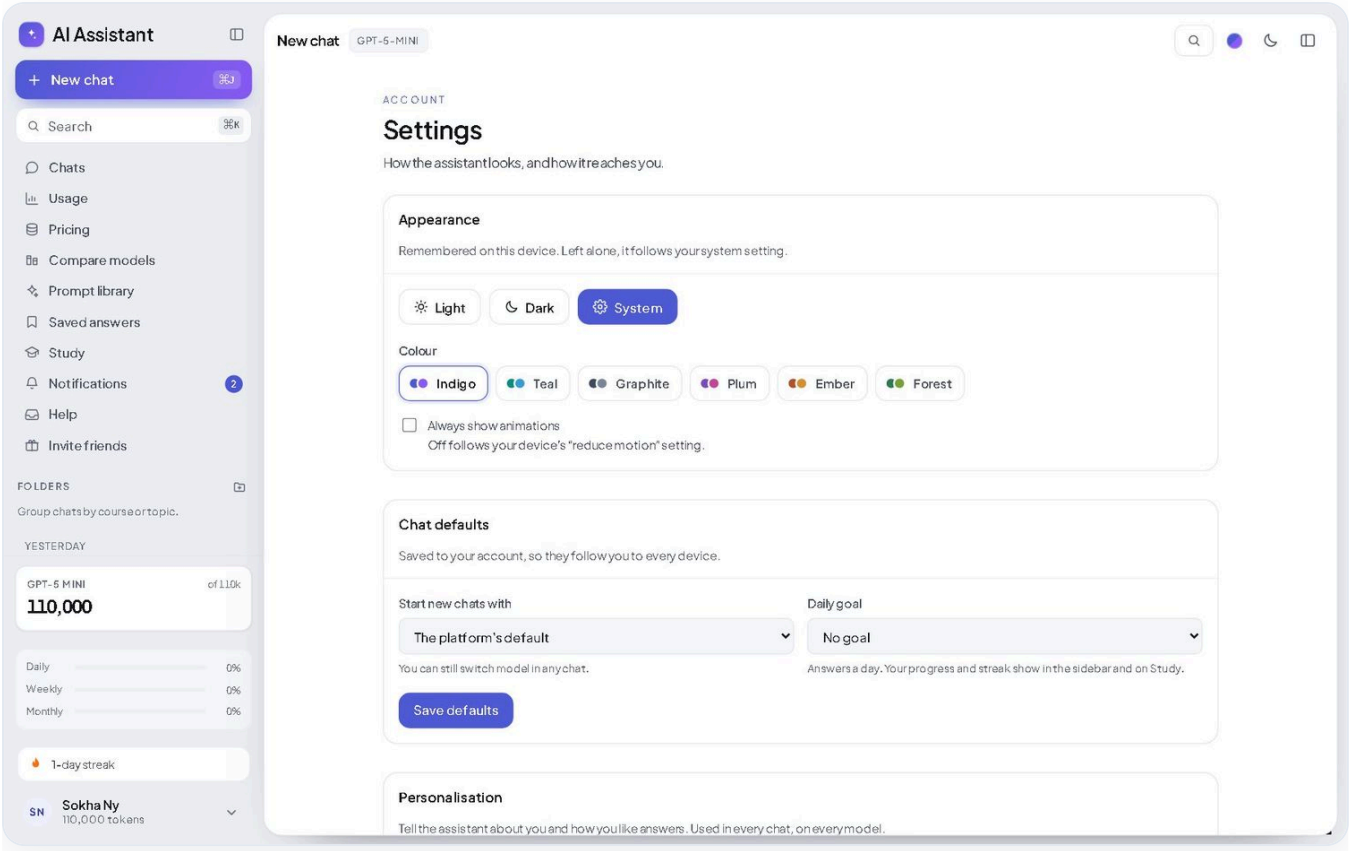

WHERE TO GO Bottom-left name → **Profile** or **Settings**

Profile: change name, e-mail and phone (Save changes), or change the password (Change password).

Settings has these sections:

SECTION	WHAT A STUDENT CAN CHANGE
Appearance	Light, Dark or System look, and one of 6 colours.
Chat defaults	Which model new chats start with, and a daily goal.
Personalisation	Answer style (Balanced, Concise, Detailed, Step by step), what the AI should know about them, and the answer language.
Notifications	Which alerts arrive by e-mail and Telegram.
Notifications on this device	Phone/computer pop-up alerts: **Turn on**, **Send a test**.
Telegram	Connect their Telegram (see below).

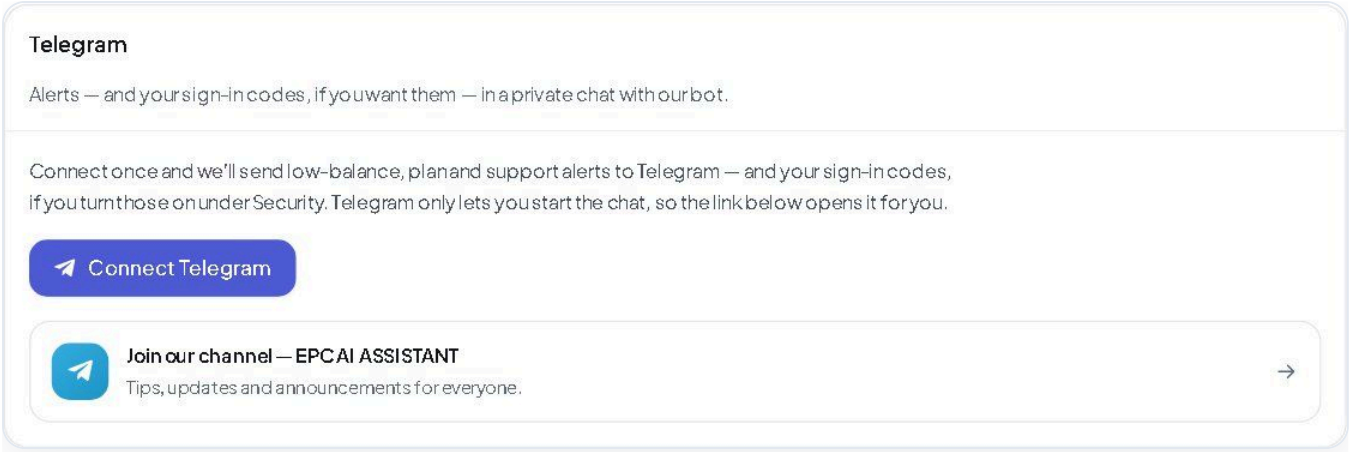

SECTION	WHAT A STUDENT CAN CHANGE
Security	**Ask for a code when I sign in**: an extra code at every sign-in.
Privacy and your data	Download all their data, or **Delete my account**.

The Settings page.

Connect Telegram (student)

1. In **Settings**, find **Telegram** and press `Connect Telegram`.
2. Press `Open in Telegram` (or scan the QR code with a phone).
3. In Telegram, press **Start**. The bot replies that the account is connected.
4. Back on the website, press `I've pressed Start — refresh`.
5. Press `Send a test message` to check it works.

The Telegram card in Settings.

PART 3

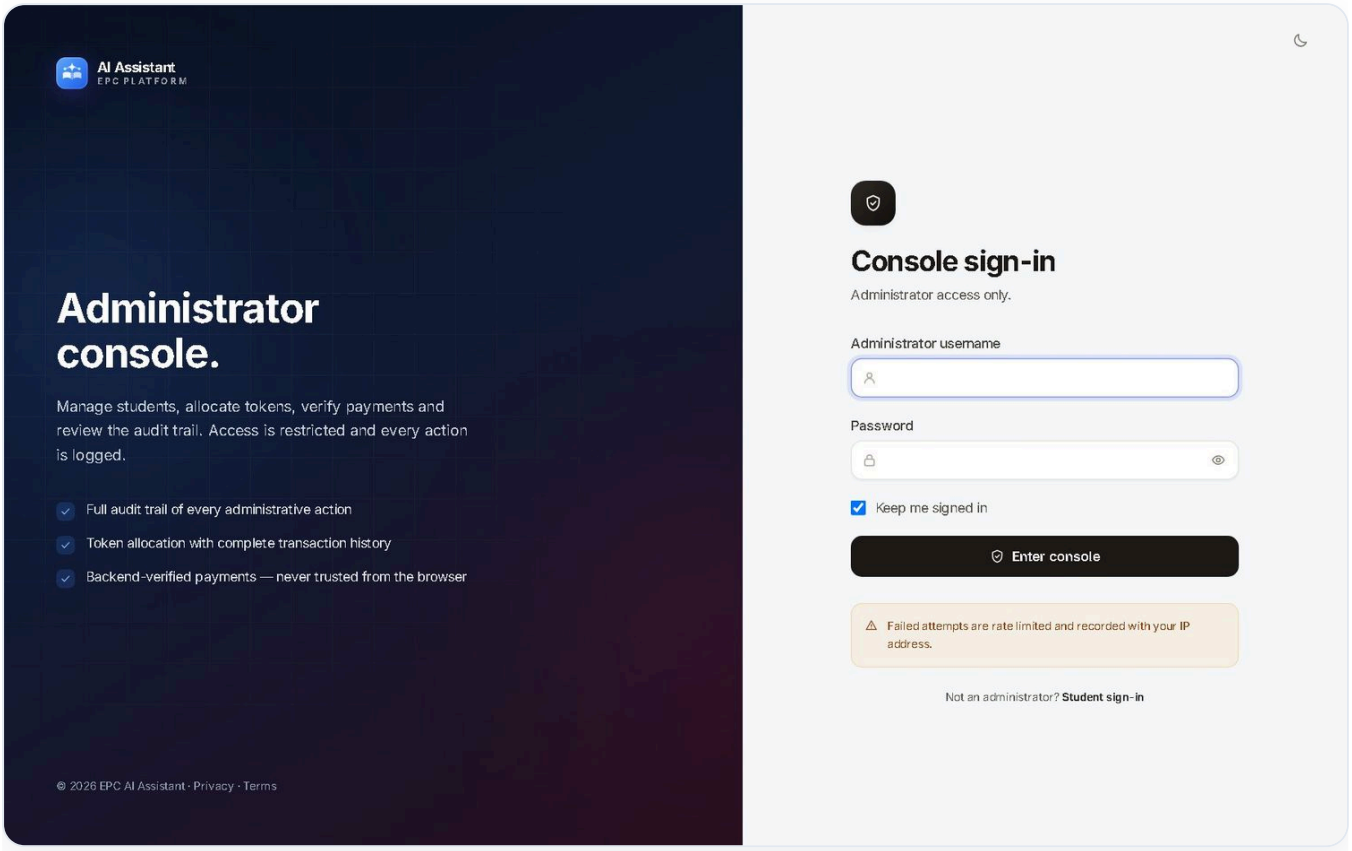

The Admin console

How you and your team run the website. Everything below is done at **https://pensionsync.online/admin/login/**.

3.1 Sign in and find your way around

WHERE TO GO https://pensionsync.online/admin/login/

1. Open **https://pensionsync.online/admin/login/**.
2. Type your **Administrator username** and **Password**, then press Enter console.

The console sign-in page.

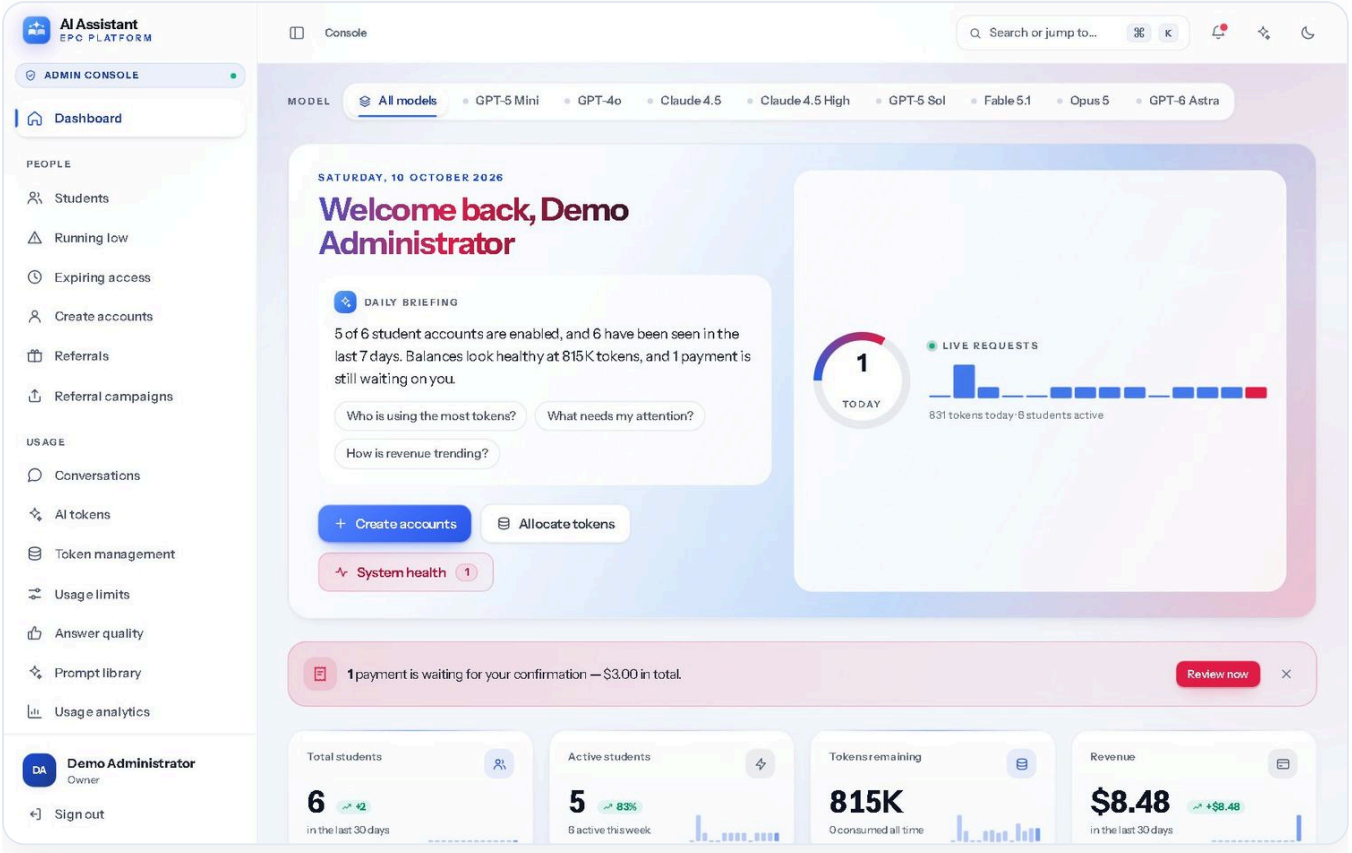

Inside, the menu on the left has four groups:

GROUP	WHAT IS INSIDE
People	Students, Running low, Expiring access, Create accounts, Referrals, Referral campaigns
Usage	Conversations, AI tokens, Token management, Usage limits, Answer quality, Prompt library, Usage analytics
Revenue	Revenue & growth, Plans, Promo codes, Payments, Payment gateways, Subscriptions, Cost & margin
System	Announcements, Telegram, Send on Telegram, Support tickets, Saved replies, Email log, Audit logs, Model status, System health, Data exports, Staff & roles, Settings

- **Search or jump to…** (top): type a student's name, a payment number or a page name to go straight there.
- **The bell** (top): things that need you: support tickets, payments to confirm, students running low.
- **The moon** (top): switch between light and dark look.

3.2 Dashboard

WHERE TO GO Dashboard WHO CAN USE IT Everyone

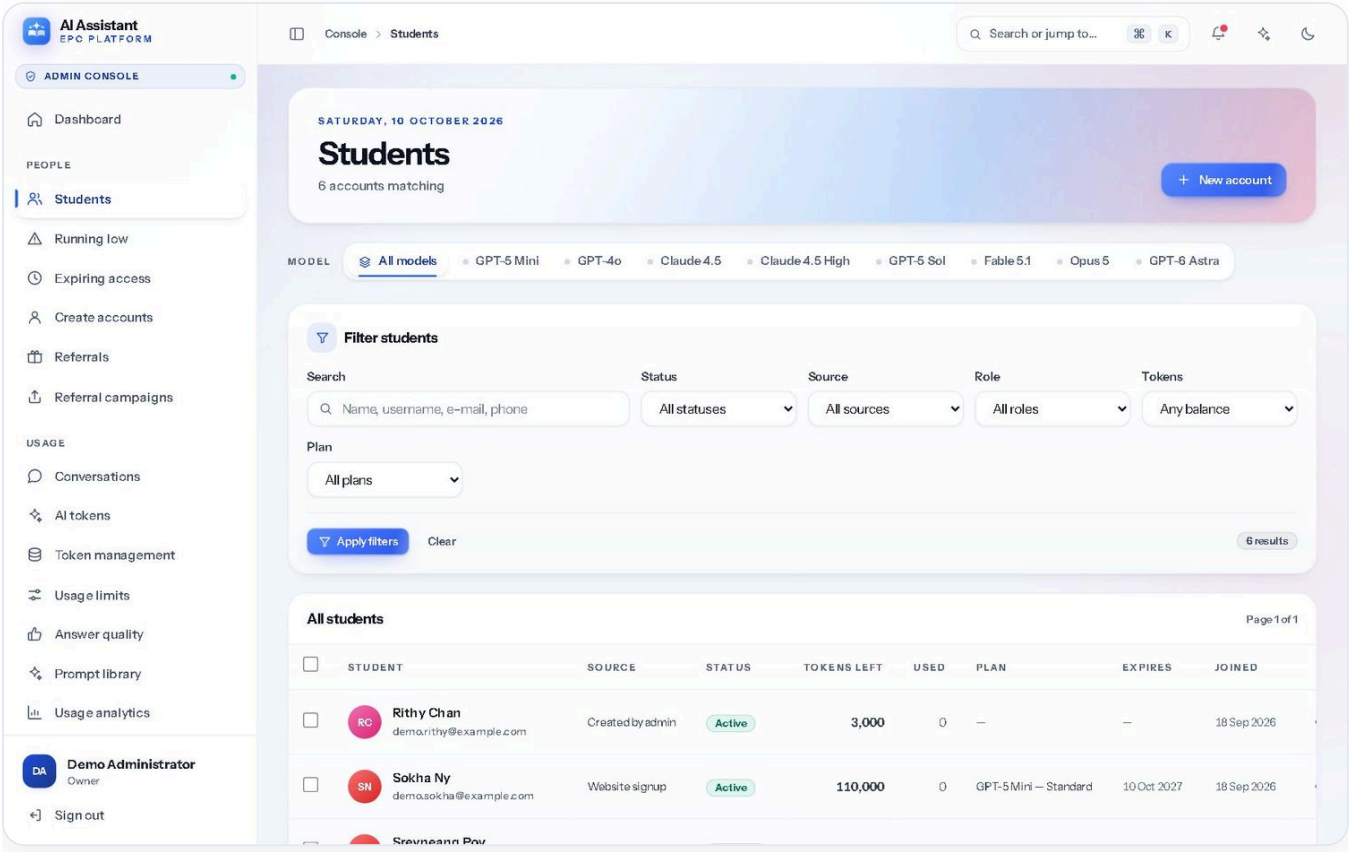

The Dashboard: a short daily briefing, live activity, payments waiting, and key numbers.

- **Daily briefing**: a one-paragraph summary of today. Press a question chip (for example *What needs my attention?*) for more.
- **Payments waiting**: press Review now to confirm them.
- **Numbers**: total students, active students, tokens remaining, revenue, with charts underneath.
- Quick buttons: Create accounts, Allocate tokens, System health.

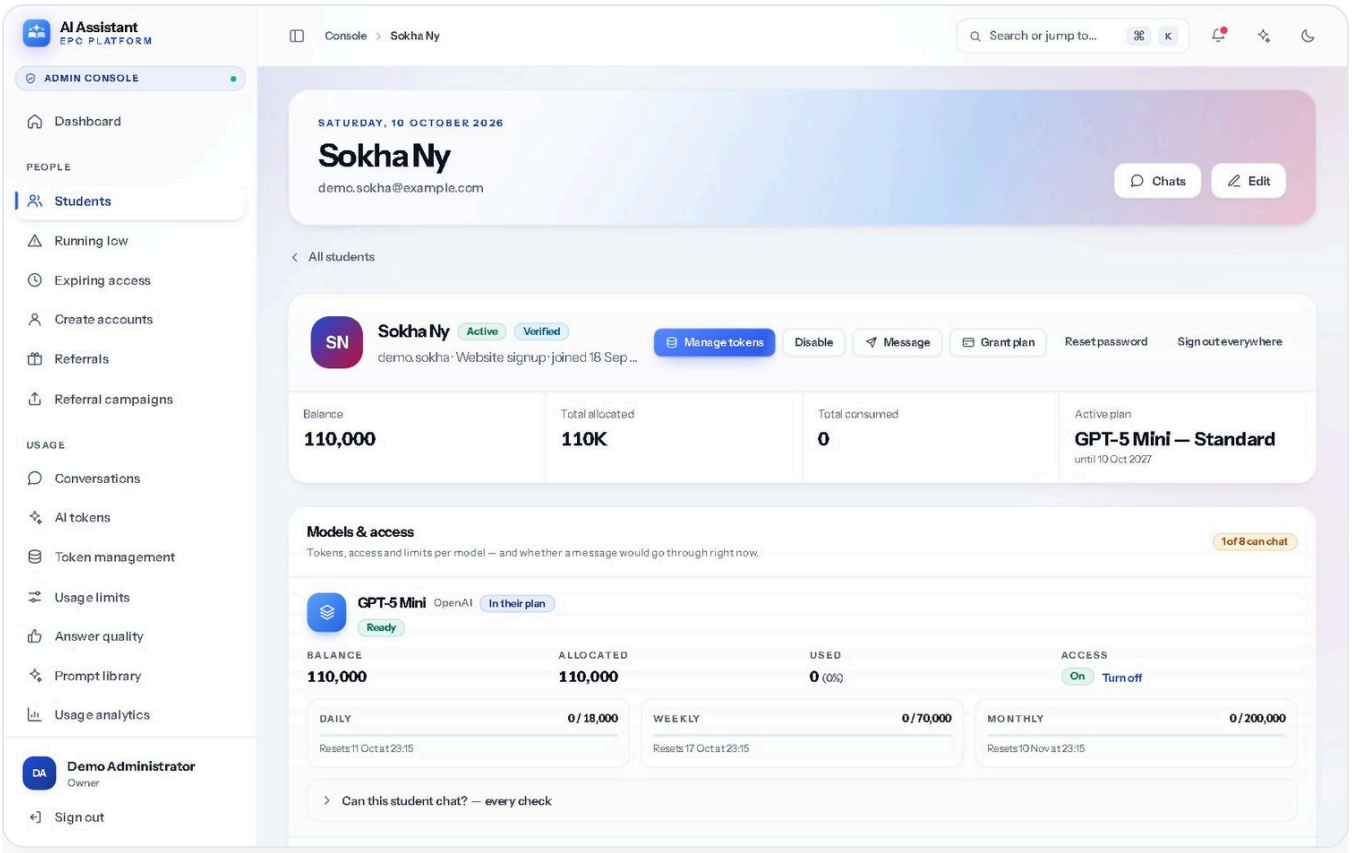

3.3 Students: find and help a student

WHERE TO GO Students WHO CAN USE IT Owner, Support, Finance, Operations

The student list.

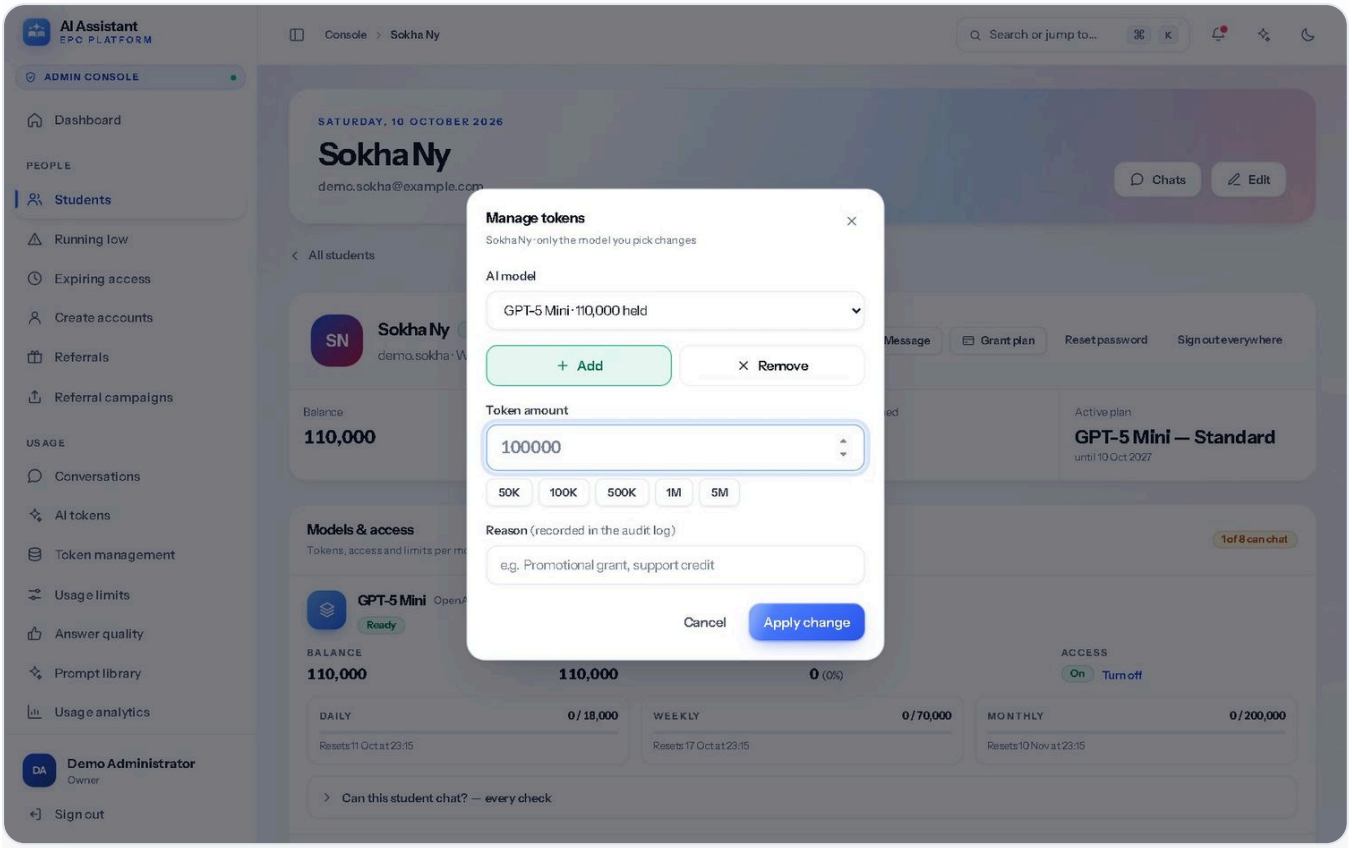

1. Open **Students**. Type a name, username, e-mail or phone in **Search** and press Apply filters.
2. Click the student's name to open their page.

A student's page. The action buttons are at the top.

BUTTON	WHAT IT DOES	HOW
Manage tokens	Give or take back tokens	Choose the AI model, press **Add** or **Remove**, type the amount (or press 50K/100K...), write a reason, press **Apply change**.
Message	Send the student a message	Type a title and message, choose the tone, tick **Also send by e-mail** if wanted, press **Send message**. It also goes to their Telegram if connected.
Grant plan	Give a plan for free (for example after a cash payment)	Choose the plan, write a reason, press **Grant plan**.
Disable / Enable	Block or unblock the account	Write a reason, press **Disable account**.
Reset password	Give the student a new password	Press it and confirm; give them the new password.
Sign out everywhere	Signs the student out on every device	Press it and confirm.

BUTTON	WHAT IT DOES	HOW
Edit	Change their name, e-mail, phone or status	Change the fields, press **Save changes**.
Chats	Read their conversations	Opens their chat list (viewing is recorded).

The Manage tokens window.

Lower on the page: **Models & access** (tokens and limits for every model, and **Can this student chat? — every check** if a student says it doesn't work), **Notes & tags** (private notes about the student), token history, payments and conversations.

Do something for many students at once

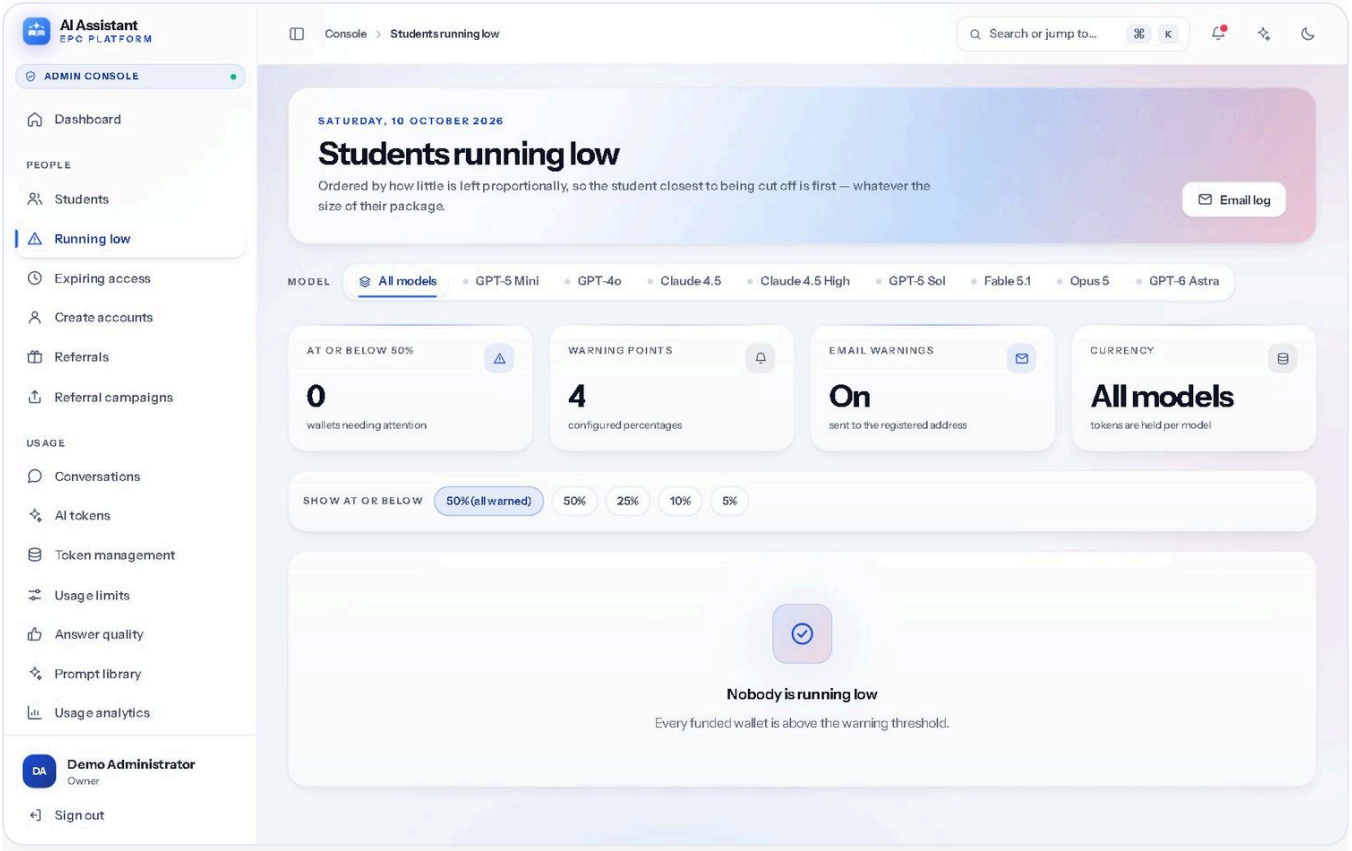

1. In the student list, tick the box next to each student (or the top box for all).
2. In the bar that appears, choose Give tokens, Message, Tag, Enable, Disable or Export CSV.
3. Check the list on the next page and press the final button (for example **Send to 12**).

3.4 Running low and expiring access

WHERE TO GO Running low / Expiring access

WHO CAN USE IT Owner, Support, Finance, Operations

- **Running low**: students almost out of tokens. Press **Add tokens** to top them up, or **E-mail a warning now** to remind them to buy more.
- **Expiring access**: plans ending in the next 7/14/30/90 days. Press **Send a renewal reminder**, or **Extend by 30 days**.

Students running low on tokens.

3.5 Create student accounts yourself

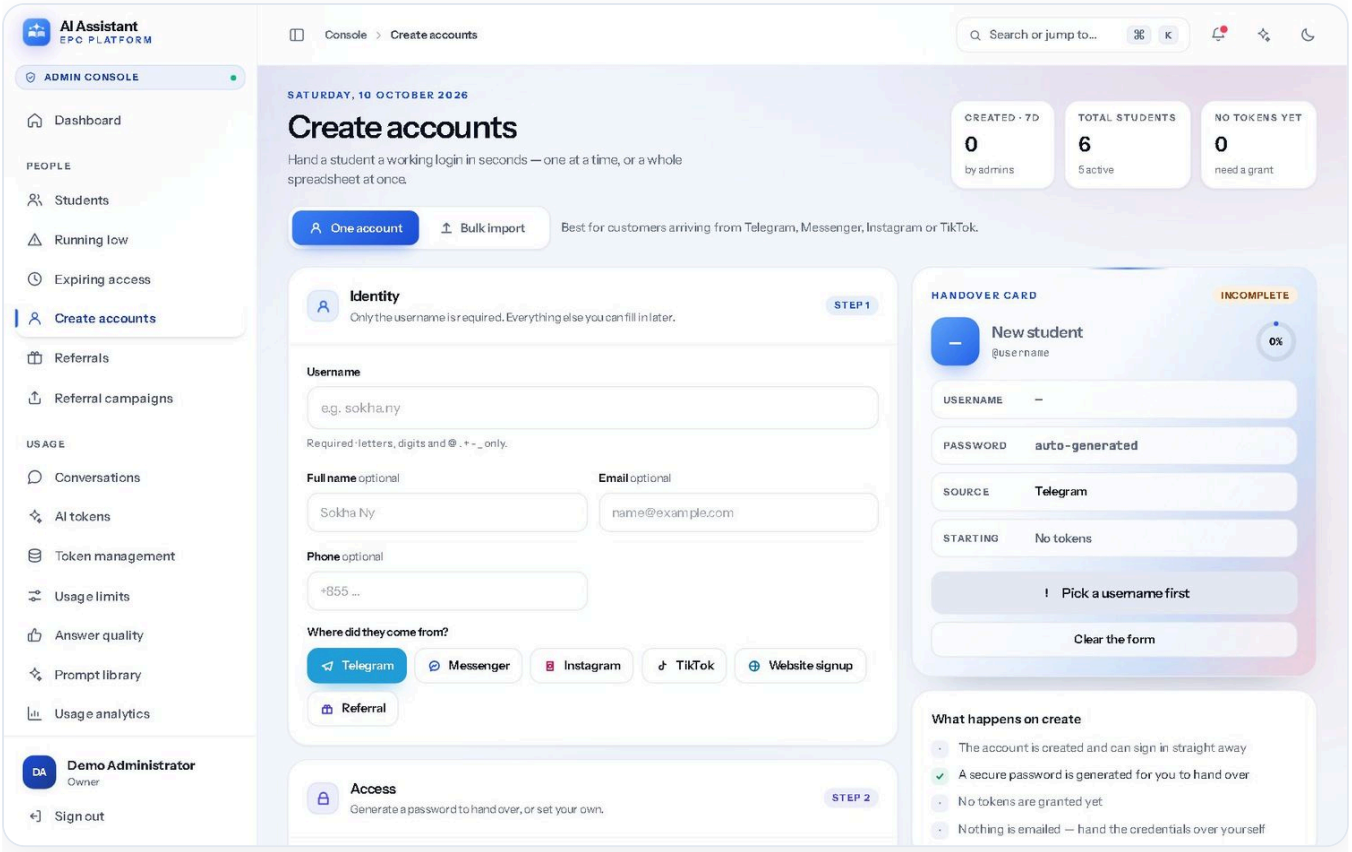

WHERE TO GO Create accounts

WHO CAN USE IT Owner

One account

1. Open **Create accounts** and stay on the **One account** tab.
2. **Step 1**: type the username, full name, e-mail and phone, and choose where they came from.

3. **Step 2**: press `Generate secure password`. Choose a plan if they paid. Tick **Email the credentials** to e-mail them their login.
4. **Step 3**: choose starting tokens (or None) and the model.
5. Press the create button. Copy the details from the **Handover card** to give to the student.

Create accounts.

Many accounts from a spreadsheet

1. Switch to **Bulk import** and press `Download template`.
2. Fill in one student per row in Excel (username, full_name, email, password, source, tokens, phone, notes). Save it.
3. Upload it under **Upload a spreadsheet** and press `Validate & preview`.
4. Fix any rows marked blocked, then press `Create accounts`.
5. On the result page press `Download CSV` to keep the passwords. They are shown only once.

3.6 Referrals and referral campaigns

WHERE TO GO **Referrals / Referral campaigns** WHO CAN USE IT Owner, Finance

- **Referrals**: who invited whom, the top referrers, and the bonus amounts (Change amounts).
- **Referral campaigns**: special codes (for example for an influencer or school). Press New code, set what the new student and the sharer get, then share the link. You can see clicks, sign-ups and purchases, and **Pause** a code at any time.

3.7 Conversations

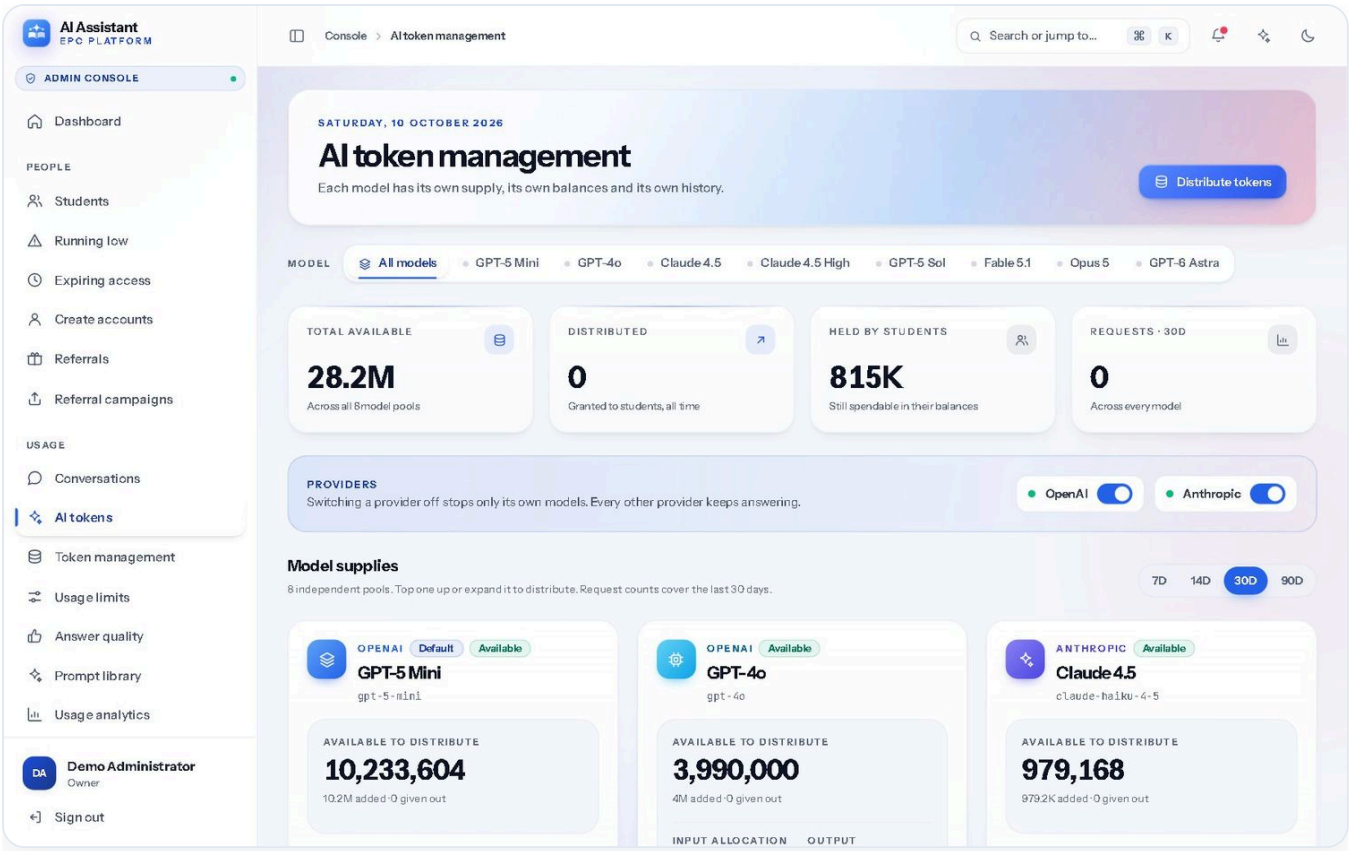

WHERE TO GO **Conversations** WHO CAN USE IT Owner, Support

Search every student chat by title, student or words. Press **Open** to read one. Use this only to help with a support problem; every view is recorded in the audit log.

3.8 Tokens: supplies, giving tokens and limits

WHERE TO GO **AI tokens / Token management / Usage limits** WHO CAN USE IT Owner, Operations

- **AI tokens**: how many tokens are left to hand out for each model (**Model supplies**). Top a supply up with Top up. Give tokens to many students under **Allocate to many students**, or to one student with Distribute tokens.
- **Token management** → **AI models** tab: switch a model on or off, choose the **default** model, and set each model's daily/weekly/monthly limits.
- **Usage limits**: a read-only list of each student's limits and how much they used.
- **Usage analytics**: charts of tokens and requests per day, and the top users.

AI tokens: the supply for each model.

3.9 Answer quality and the prompt library

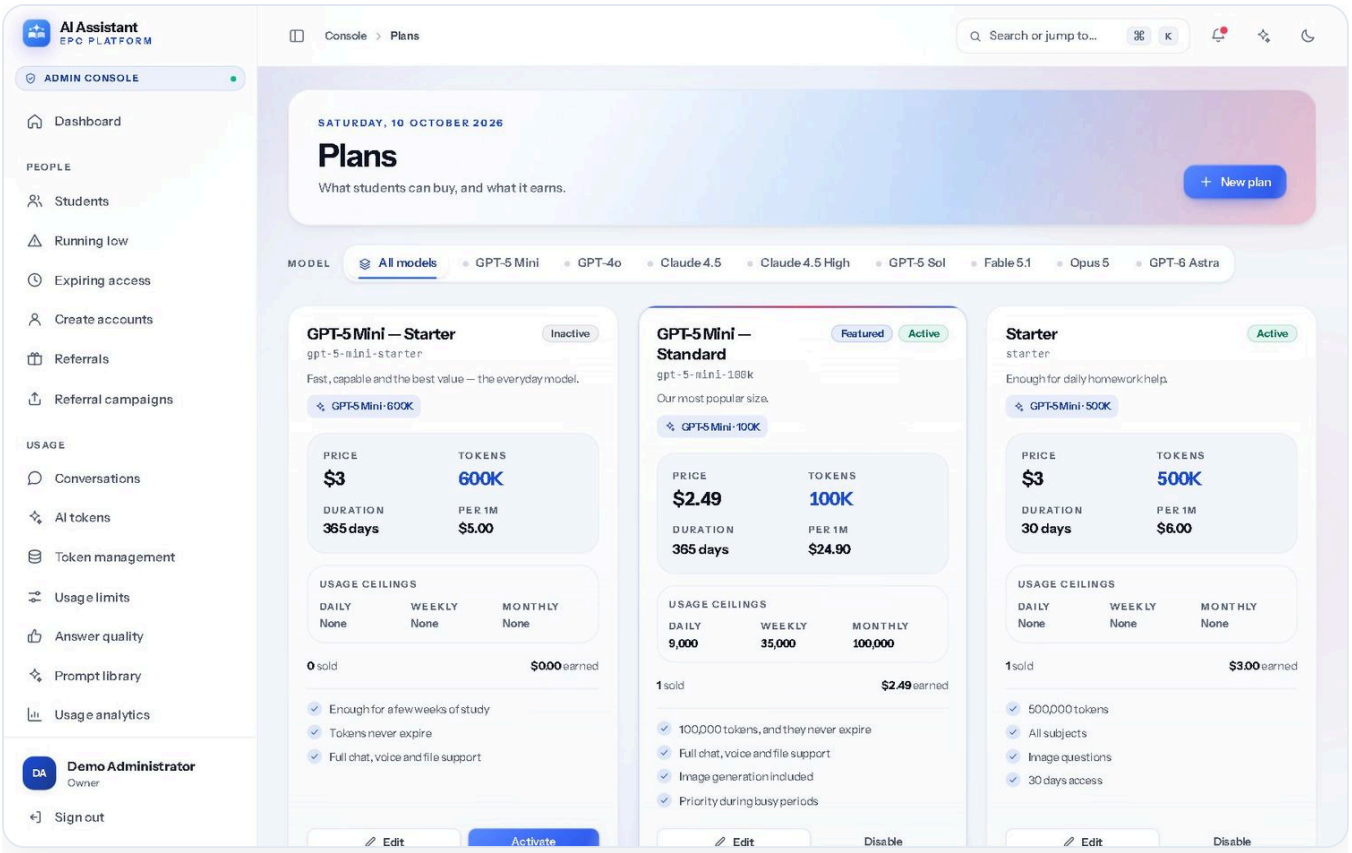

WHERE TO GO Answer quality / Prompt library **WHO CAN USE IT** Owner, Content

- **Answer quality**: every answer a student marked "Not helpful", with the reason. Press **Review**, mark it reviewed or resolved, and add a note.
- **Prompt library**: the ready-made questions students see. Add one under **New featured prompt** and press Publish prompt. Hide or delete any time.

3.10 Plans and prices

WHERE TO GO Plans **WHO CAN USE IT** Owner, Finance

1. Open **Plans**. Each card shows the price, tokens, how long it lasts, and how many were sold.
2. To change one, press **Edit**, change the price or tokens, and press Save changes.
3. To add one, press New plan, fill in the name, model, price, tokens and duration, and press Create plan.
4. To stop selling one, press **Disable** (students who already bought it keep their tokens).

Plans.

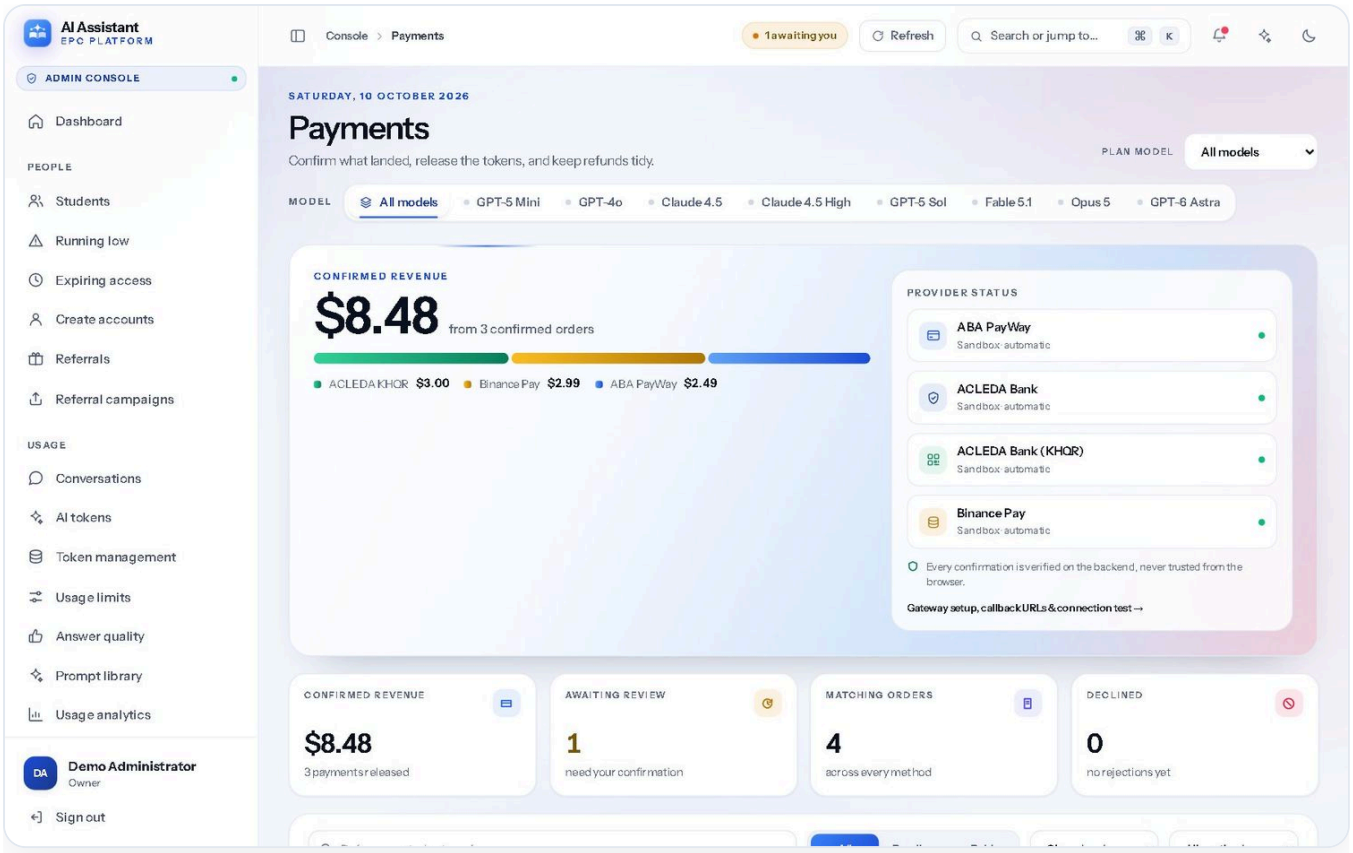

3.11 Promo codes

WHERE TO GO Promo codes **WHO CAN USE IT** Owner, Finance

1. Press **New code**.
2. Type the code (for example **WELCOME20**), choose **Percentage off** or **Fixed amount off** and the amount.
3. Optional: limit total uses, uses per student, start and end dates, and which plans it works on.
4. Save. Students type the code at checkout. Press **Pause** to stop it.

3.12 Payments: confirm, decline or refund

WHERE TO GO Payments **WHO CAN USE IT** Owner, Finance

Payments: confirmed revenue at the top, then every order.

Most payments (ABA, ACLEDA, Binance) are confirmed automatically by the bank, and the tokens arrive by themselves. You only need this page when something needs a person:

SITUATION	WHAT TO DO
A student says they paid but has no tokens	Find the order (search by name or reference), open it, press **Re-check with provider**. If the bank shows it as paid, it confirms and adds the tokens.
A payment is waiting for review (receipt uploaded)	Open it, look at the **Payment proof** picture, check your bank app, then press **Confirm & release** (or **Decline**).
Amount mismatch or duplicate warning	Check your bank statement before confirming.
A refund is needed	Open the paid order and press **Refund**. The tokens are taken back. (Send the money back from your bank yourself.)

> **Be careful:** only confirm a payment after you see the money in your bank. Never confirm because of a screenshot alone.

3.13 Payment gateways

WHERE TO GO **Payment gateways** WHO CAN USE IT Owner, Finance

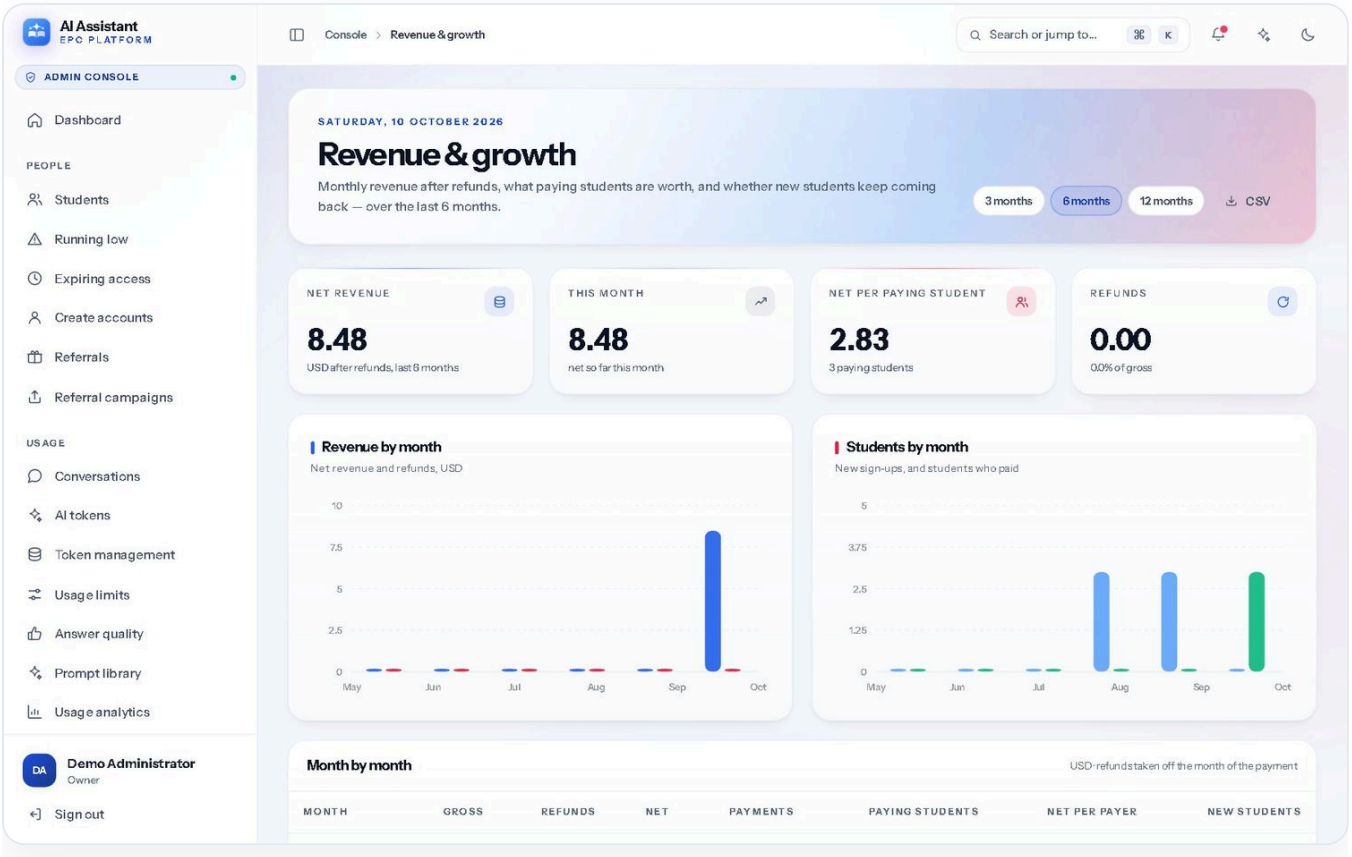

Shows whether ABA PayWay, ACLEDA Bank and Binance Pay are working, with a **Test connection** button for each, and the last 7 days of paid, pending, expired and failed payments. Changing bank keys is a technical job. Ask your developer.

3.14 Subscriptions, revenue and costs

WHERE TO GO **Subscriptions / Revenue & growth / Cost & margin**

WHO CAN USE IT Owner, Finance

- **Subscriptions**: every student's plan. Press **End date** to extend or shorten it, or **Cancel**.
- **Revenue & growth**: money and new students month by month, by plan and by payment method. Press **CSV** to download.
- **Cost & margin**: what the AI costs you versus what students paid, per model.

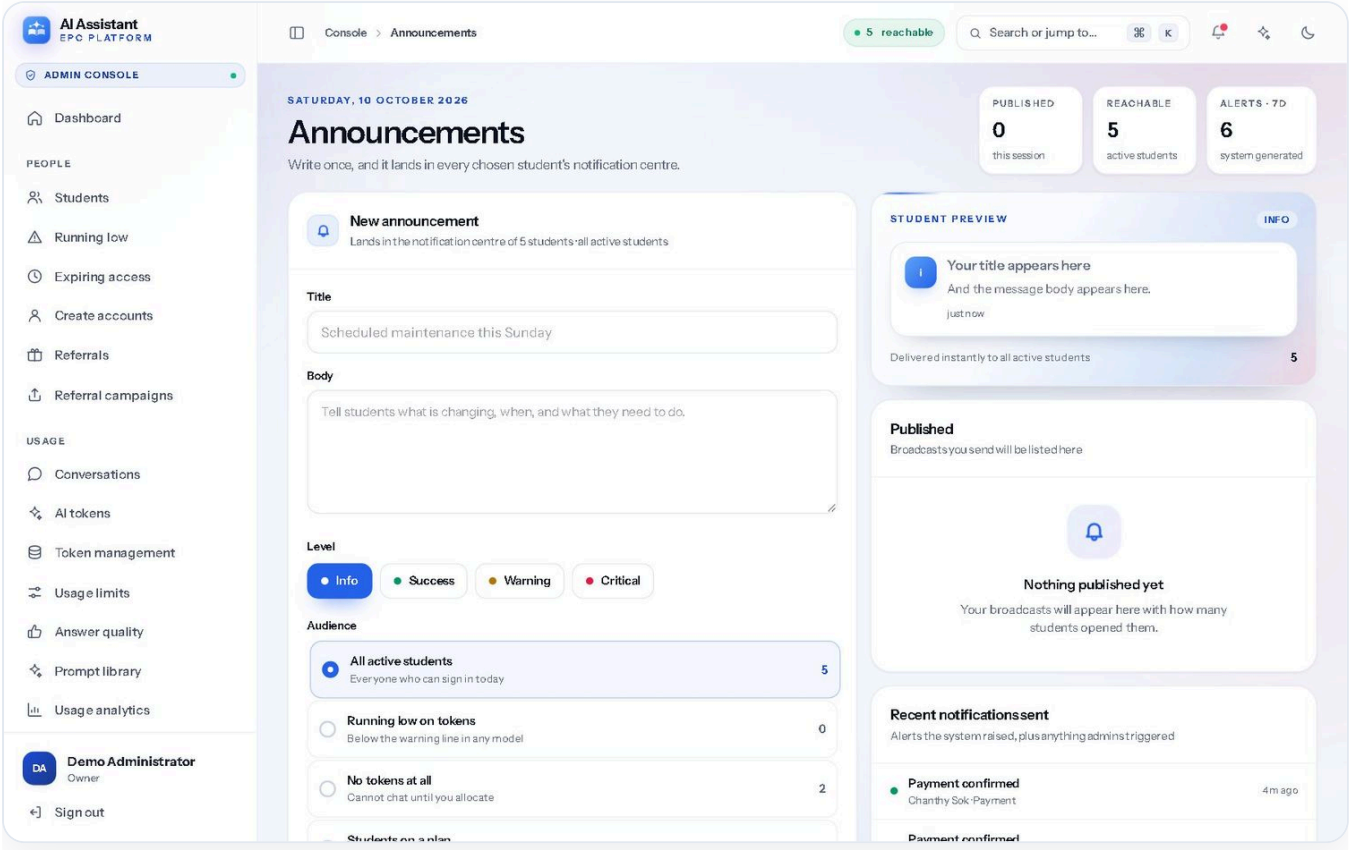

Revenue & growth.

3.15 Announcements (message every student)

WHERE TO GO **Announcements** WHO CAN USE IT Owner, Content

1. Under **New announcement**, write a **Title** and the message (**Body**).
2. Choose the **Level**: Info, Success, Warning or Critical.
3. Choose the **Audience**: all students, students running low, students with no tokens, or students on a certain plan or model.
4. Optional: add a button (text and link), or choose a time in **Send at** to send it later.
5. Optional: tick **Post to the Telegram channel**, **Post to the Telegram group** and/or **Also send to students' Telegram chats**.
6. Check the preview on the right, then publish.

Writing an announcement, with the student preview.

Under **Published**, you can see how many opened it, and press **Retract** to take it back (it is also deleted from Telegram).

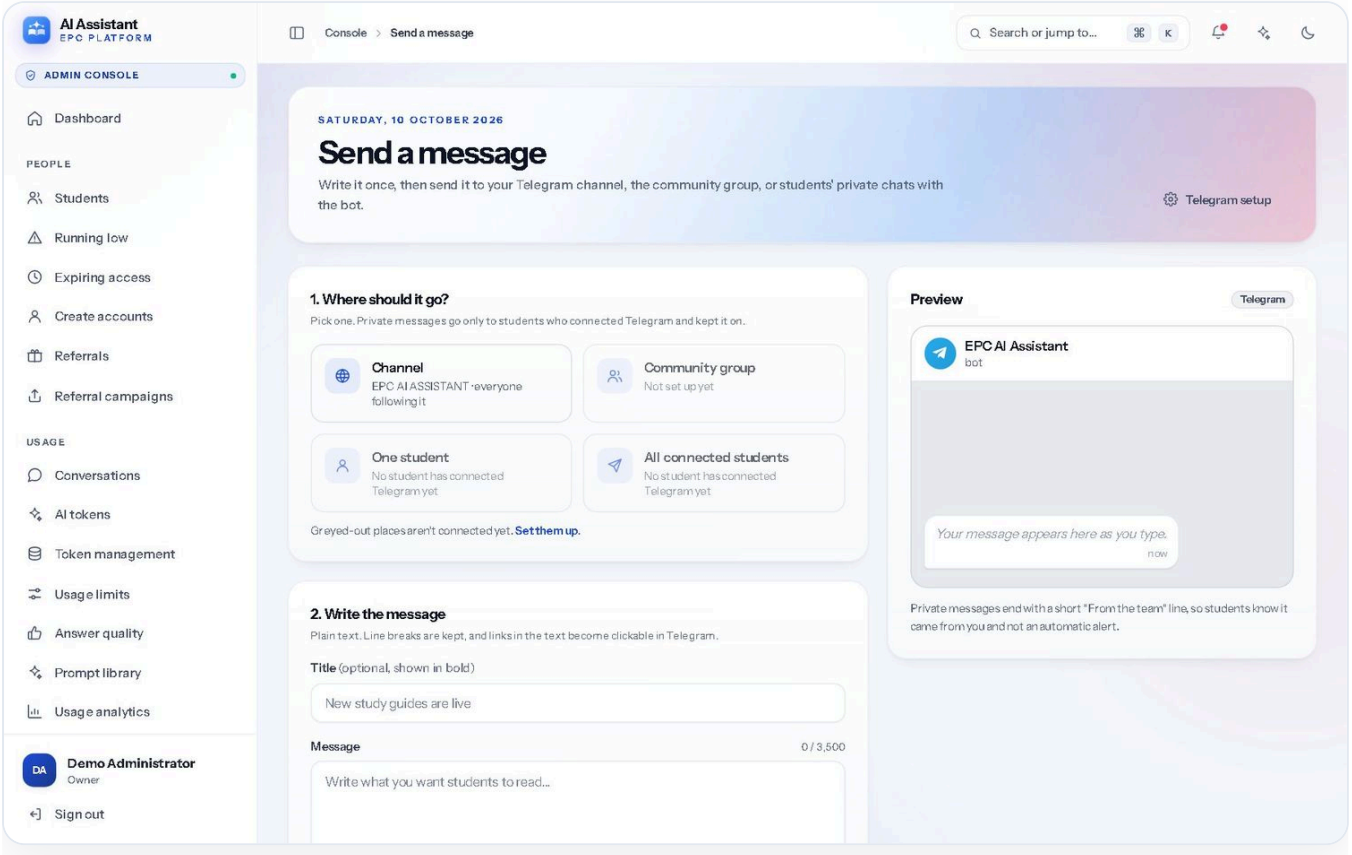

3.16 Telegram and Send on Telegram

WHERE TO GO **Telegram / Send on Telegram**

Telegram shows whether the bot is **Online**, the channel and group, which automatic alerts go to Telegram (switch each on or off and press **Save alerts**), and which students connected.

Send one message on Telegram

1. Open **Send on Telegram**.
2. **1. Where should it go?**: pick **Channel**, **Community group**, **One student** (then choose the student) or **All connected students**.
3. **2. Write the message**: an optional title and the message. Optional: **Add a link button**.
4. Check the **Preview**, which shows it as it will look in Telegram.
5. Press the send button (it says where it is going, for example Post to the channel).

Send on Telegram.

Recent messages at the bottom shows whether each message arrived. Channel and group posts have a **Delete** button for 48 hours.

Your own Telegram (for your sign-in codes and test messages)

On the **Telegram** page, under **Your Telegram**, press `Connect my Telegram`, then **Open in Telegram** and **Start**. Then press `Send test to my chat`.

3.17 Support tickets and saved replies

WHERE TO GO **Support tickets / Saved replies** WHO CAN USE IT Owner, Support

1. Open **Support tickets**. New requests from students appear here (and on the bell).
2. Press **Open** on a ticket to read it.
3. Type your answer in the reply box. Use **Insert a saved reply...** for common answers. Press **Send**.
4. Under **Manage**, set the status (for example **Resolved**) and press **Save changes**.

Saved replies: write answers you use often once, and insert them in one click. Type **{name}** in a reply to fill in the student's first name.

> **Tip:** Tick **Internal note** to write something only your team can see.

3.18 Keeping the system healthy

WHERE TO GO **Model status / System health / Email log** WHO CAN USE IT Owner, Operations

- **Model status**: if an AI model is having problems, set it to **Slow or unreliable** or **Paused** with a note for students. In an emergency press `Pause all chat...` (and `Resume chat` afterwards). You can also turn on a daily summary e-mail.
- **System health**: green means fine. It warns you when a model's supply will run out soon.
- **Email log**: every e-mail the website sent. Failed ones have a **Retry** button.
- **Data exports**: download students, payments, tokens, tickets and more as spreadsheets (CSV).
- **Audit logs** (Owner only): a record of everything every staff member did.

3.19 Staff and roles

WHERE TO GO **Staff & roles** WHO CAN USE IT Owner

1. Under **New staff account**, type the username, full name and e-mail, and choose a role.

2. Press **Create staff account**. Copy the temporary password and give it to them.
3. To change someone's role later, pick it in the list and press **Save**. To remove access, press **Disable**.

ROLE	CAN OPEN
Owner	Everything, including staff, settings and the audit log.
Support	Students (read and help), messages, tickets, conversations.
Finance	Payments, plans, promo codes, subscriptions, revenue, referrals.
Content	Announcements, Telegram channel/group posts, prompt library, answer quality.
Operations	Tokens and models, usage limits, model status, health, e-mail log, exports, Telegram setup.

3.20 Settings

WHERE TO GO Settings WHO CAN USE IT Owner

Business rules you can change any time. Change what you need and press **Save settings** at the bottom.

GROUP	MOST USEFUL SETTINGS
Growth & bonuses	Free trial tokens (now 3,000), turn the free trial on/off, referral bonus amounts, turn referrals on/off.
Alerts & reminders	When students are warned about low tokens, and how many days before a plan ends they are reminded.
Security	**Sign-in code for every student** (an extra code at every sign-in), **Send codes to Telegram and e-mail**, code length and lifetime, one device at a time.
Assistant behaviour	Follow-up suggestions, sharing chats, personalisation, image reading.
Usage limits	Warning levels and whether students see the usage meter.
Support & contact	WhatsApp number and message, support hours.
Image generation	Turn pictures on/off, quality, and how many tokens a picture costs.
Payments	The riel exchange rate and how long a student has to pay.

GROUP	MOST USEFUL SETTINGS
Telegram alerts	Which automatic alerts go to Telegram.
General	App name, support e-mail and Telegram, open/close public sign-up, a banner message for all students, maintenance pause.

Be careful: Sign-in code for every student makes every student enter a code at every sign-in. Make sure e-mail is working first (test with Forgot password).

PART 4

Test everything: checklist

Go through this list once, top to bottom, to check every part works. Tick each box as you go. Use one test student account and your owner account. Tip: open the student side in a normal window and the console in a private/incognito window, so you can be signed in as both at the same time.

A. Student: account

	DO THIS	IT WORKS IF...
☐	Sign up as a new test student (2.1)	A code arrives by e-mail; after typing it you reach the chat page.
☐	Check the token box at the bottom left	It shows 3,000 GPT-5 Mini tokens.
☐	Sign out (bottom-left name → Sign out) and sign in again	You are back in the chat.
☐	Use **Forgot password?** on the sign-in page	A reset code arrives; the new password works.

B. Student: chat

	DO THIS	IT WORKS IF...
☐	Ask a question	The answer appears word by word; tokens go down.
☐	Press stop while an answer is being written	It stops.
☐	Send a photo of a question (+ → Photos)	The answer talks about the photo.
☐	Speak a question with the microphone	Your words appear in the box.
☐	Ask *Draw a simple picture of a cat*	A picture appears with Download and Share.
☐	Press Copy, Listen, Helpful, Save and Regenerate on an answer	Each does what 2.3 says.

	DO THIS	IT WORKS IF...
☐	Rename, pin, archive and delete a chat; then restore it from **Recently deleted**	All work; the chat comes back.
☐	Make flashcards from a chat (⋯ → Make flashcards)	Cards appear and can be turned.
☐	Share a chat and open the link in another browser	The chat is readable there.
☐	Press Ctrl + K and search for a word from an old chat	The chat is found.

C. Student: money

	DO THIS	IT WORKS IF...
☐	Pricing → buy the smallest package, pay with ABA	Receipt appears; tokens are added; Billing lists it.
☐	Repeat with ACLEDA and with Binance (if you use them)	Same result.
☐	Try a promo code at checkout (create one first, 3.11)	The price goes down.
☐	Open Usage and Billing	Spending and receipts are shown.

D. Student: other pages

	DO THIS	IT WORKS IF...
☐	Prompt library → Use in chat	The prompt goes into the chat box.
☐	Help → send a support request	It appears in **Your requests** (and in the console's Support tickets).
☐	Invite friends → Copy link; sign up a second test account with it	Both accounts get the referral bonus.
☐	Settings → change Appearance to Dark	The site turns dark.
☐	Settings → Telegram → Connect, then Send a test message	The test message arrives in Telegram.
☐	Settings → Security → tick **Ask for a code when I sign in**; sign out and in	A code is asked for and arrives.

E. Admin: students and tokens

	DO THIS	IT WORKS IF...
☐	Students → search for the test student and open them	Their page shows their tokens and plan.
☐	Manage tokens → Add 1,000 GPT-5 Mini tokens	The student's token box goes up; they get a notification (and Telegram message).
☐	Message → send a message	It appears in the student's Notifications (and Telegram).
☐	Grant plan → give a plan	The plan shows on the student's page and in their Billing.
☐	Disable the account, try to sign in as the student, then Enable	Sign-in is refused while disabled, works after.
☐	Create accounts → create one account with tokens	The new student can sign in with the password shown.

F. Admin: money and messages

	DO THIS	IT WORKS IF...
☐	Payments → find your test payment	It shows as Paid.
☐	Plans → edit a price, check Pricing on the student side, then change it back	The student sees the new price.
☐	Announcements → publish one to all students	It appears in the student's Notifications.
☐	Send on Telegram → One student → your test student	It arrives in their Telegram; shows **Delivered**.
☐	Send on Telegram → Channel	The post appears in your channel; Delete removes it.
☐	Support tickets → open the test request and reply	The student sees the reply under Help → Your requests.

G. Admin: settings and staff

	DO THIS	IT WORKS IF...
☐	Settings → change the Dashboard banner text and save	Students see the banner at the top.

	DO THIS	IT WORKS IF...
☐	Staff & roles → create a Support account and sign in with it	It can open Students and Support tickets, but not Settings or Payments.
☐	Model status → set a model to **Slow or unreliable** with a note	Students see the note in the model list. Set it back to **Working normally**.
☐	Audit logs	Everything you just did is listed.

PART 5

Problems and quick answers

PROBLEM	WHAT TO DO
A student didn't get the e-mail code	Ask them to check Spam/Junk. On the code page they can press **Send a new code**. Check the console's **Email log**: a failed e-mail has **Retry**.
A student paid but has no tokens	Payments → open the order → **Re-check with provider**. If your bank shows the money, press **Confirm**.
A student says *No tokens left*	They need to buy more (Pricing), or you can add tokens on their page (Manage tokens).
A model says *Locked*	The student has no tokens for that model. They can buy that model's tokens or switch back to GPT-5 Mini.
A student is signed out on their computer	Only one device can be signed in at a time. Signing in on a phone signs out the computer.
Telegram messages don't arrive	Telegram page → check the bot is **Online**. Ask the student to open the bot and press **Start** again (they may have blocked it).
Students can't chat at all	Model status: check **Pause all chat** is off. System health: look for red warnings.
You forgot your console password	Another Owner can reset it on your account page, or ask your developer.
Something else	Write down what you did, take a screenshot, and send it to your developer.

Tip: Every action in the console is recorded in **Audit logs**, so you can always see who changed what and when.
